LIBERALITY OF BABU OODIT NARAIN SINGH OF HANDWAH BHAGULPORE.

THE following correspondence is published for general information.

By order of the Lieutenant-Governor of Bengal,
H. J. S. COTTON,
Secretary to the Government of Bengal.

MUNPL. DEPT.,
The 12th August 1890.

No. 2 ^{R-T}/_M, dated Yacht Rhotas, the 12th August 1890.

From—H. J. S. COTTON, Esq., Secretary to the Government of Bengal, Municipal Department,
To—The Commissioner of the Bhagulpore Division.

I AM directed to acknowledge the receipt of your letter No. 1312G, dated 8th August 1890, and to request that you will communicate to Babu Oodit Narain Singh of Handwah the Lieutenant-Governor's high appreciation of his public spirit and liberality in subscribing Rs. 26,000 towards the completion of the Bhagulpore water-works and a further sum of Rs. 10,000 in aid of the Leper Asylum Fund.

2. A copy of the correspondence will be published in the *Calcutta Gazette*.

No. 1312G, dated Bhagulpore, the 8th August 1890.

From—C. C. QUINN, Esq., Offg. Commissioner of the Bhagulpore Division,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to forward, for the information of the Lieutenant-Governor, a copy of a letter from Babu Oodit Narain Singh of Handwah, containing the munificent offer of Rs. 26,000 towards the completion of the Bhagulpore water-works and of a further sum of Rs. 10,000 in aid of the Leper Asylum Fund. I would suggest that the liberality and public spirit which Babu Oodit Narain Singh has displayed by this offer may receive the recognition of Government.

From—BABU OODIT NARAIN SINGH, Rajah of Handwah,
To—The Commissioner of the Bhagulpore Division.

I MOST humbly and respectfully beg to offer Rs. 26,000 towards the completion of the water-works at Bhagulpore and Rs. 10,000 towards a Leper Asylum in this town.

REPORT ON THE STATE OF THE SALT MARKET FOR THE FIRST QUARTER OF 1890-91.

No. 588B, dated Calcutta, the 12th August 1890.

From—K. G. GUPTA, Esq., Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

I AM directed by the Board of Revenue to submit the following report on the state of the salt market for the first quarter of 1890-91, comprising the months of April, May, and June 1890.

SALT.

SIR H. L. HARRISON, KT.

2. The quantity of salt of every description cleared during the quarter under report amounted to 26,51,986 maunds 8 seers 5 chittacks, against 24,01,999 maunds 18 seers 6 chittacks in the previous quarter, and 24,03,784 maunds 35 seers 15 chittacks in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 62,34,543-12, against Rs. 56,82,037-13 in the previous quarter, and Rs. 56,36,201-9 in the corresponding quarter of the previous year.

3. The quantity of excise salt sold in Orissa during the quarter under review and the quantity which remained in store at the close of the quarter are shown in table I:—

TABLE I.

				Cuttack.	Pooree.	Balsore.
				Mds. s. t.	Mds. s. t.	Mds. s. t.
Balance at close of the last quarter	1,32,241	0 0	1,620 0 0
Manufactured or added during the quarter
Total	1,32,241	0 0	1,620 0 0
Sales during the quarter	46,247	0 0	50 0 0
Wastage	4,112	0 0
Total	50,359	0 0	50 0 0
Balance at close of the quarter	81,882	0 0	1,570 0 0

4. The total sale of excise salt during the quarter under review amounted to 46,297 maunds, against 37,086 maunds in the previous quarter, and 16,270 maunds in the corresponding quarter of the previous year.

5. The subjoined table shows in comparison the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter under review and the corresponding quarter of the previous two years:—

9. The quantity of salt despatched by the East Indian Railway to stations beyond Buxar during the quarter under review amounted to 3,341 maunds 10 seers, as noted in the margin, against 2,733 maunds 30 seers in the previous quarter, and 2,430 maunds in the corresponding quarter of the previous year.

10. The shipments of Liverpool salt for the port of Calcutta according to published market reports were as follow :—

	Tons.
April	35,570
May	29,990
June	24,920
Total	90,480

11. Table VI shews the market price per 100 maunds of Liverpool and other descriptions of salt at the close of each fortnight during the quarter as compared with those obtaining during the same period last year:—

TABLE VI.

	Total	6,320 0 0	85,844 12 8	1,14,403 32 8

No transactions in sea-imported salt have been reported for the quarter from the ports of Cuttack, Pooree, and Balasore.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 16th August, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
<i>Western Districts.</i>			
BURDWAN DIVN.	1 Burdwan Aug. 16, '90	2.26	Weather—rainy and cloudy. Transplantation of <i>amun</i> going on. Prospects good. Prices of common rice —
	Culna ...	1.69	
	Cutwa ...	2.84	
	Ranigunge ...	4.48	
	2 Bankoora „ 16, '90	1.24	Weather—warm. Transplanting of <i>amun</i> rice finished and weeding going on vigorously. Sugarcane prospering. It is estimated that about 16 annas of the area under rice have been cultivated this year in the Bissenpore subdivision. Common rice selling at 19 seers per rupee at Sudder and 17 seers at Bissenpore.
	3 Birbhum „ 16, '90	1.21	Breaks of dry weather more frequent. Prospects of paddy very promising. Prices of rice range from 16 to 18 seers per rupee.
	Rampore Haut ...	4.93	
	4 Midnapur „ 16, '90	2.01	Weather—showery. More rain wanted in some parts. Paddy doing well. Transplantation still going on. Prices of common rice:—
			Srs. Sudder ... 15½ Contai ... 15 Ghatal ... 16 Tumlook ... 14 } per rupee.
	5 Hooghly „ 16, '90	1.49	Weather—seasonable. State and prospects of crops good. Prices of common rice:—
PRESIDENCY DIVN.	Serampore ...	2.67	
	Jehanabad ...	4.18	
	Howrah „ 16, '90	3.60	Weather—seasonable. <i>Aus</i> , <i>amun</i> , jute, and sugarcane doing satisfactorily. Prospects good. Price of common rice 13 to 14 seers per rupee.
	Uluberia ...	2.65	
	<i>Central Districts.</i>		
	6 24-Pergbs. Aug. 19, '90	2.27	Weather—hot and clear with occasional light showers. Prospects good. <i>Aus</i> and jute being cut. Transplantation of <i>amun</i> going on vigorously, but more rain wanted. Price of rice stationary.
	7 Nuddea „ 16, '90	2.55	Weather—seasonable. Crops on high lands continue good, but those on low lands swamped by floods. Rivers still rising.
	Kushtea ...	2.41	
	Meherpore ...	2.20	
	Chudanga ...	4.26	
RAJSHAHYE DIVN.	8 Khoolna „ 16, '90	1.30	Weather—seasonable. Prospects of crops continue favourable. Transplantation now going on rapidly.
	Bagirhat ...	1.92	
	Satkshira ...	2.63	
	9 Jessore „ 16, '90	6.85	Weather—hot and cloudy with occasional showers. Harvesting of <i>aus</i> going on. Partial damage to <i>amun</i> and <i>aus</i> crops done by early rise of rivers in parts of Jhenidah, Magura, and Bongong subdivisions.
	Jhenidah ...	2.23	
	Magura ...	4.71	
	Narail ...	4.49	
	Bongong ...	1.77	
	10 Moorshedabad „ 16, '90	3.24	Weather—fine with passing clouds. The gauge stood 30' 11½" last noon (15th), the highest rise ever on record. To-day (16th) there is a fall by 5 of an inch. Greater portion of <i>aus</i> submerged under water, and the outturn will, as it appears, be much less than usual. Some <i>amun</i> lands in the Lalbagh subdivision and greater portion of them in the Kandi subdivision have been overflooded, but transplantation will begin on the receding of the water.
	11 Dinagepur „ 16, '90	0.25	There has been a break in the rains, with hot and sultry weather, but to-day (16th) it is raining again. Harvesting of jute and <i>dhadoi</i> paddy going on. Outturn of each crop may still be estimated at 18 annas. Prospects of <i>haimanti</i> paddy continue to be very favourable. It is expected that this crop will be transplanted over the full usual area, but only about 12 annas of the crop have as yet been transplanted. Price of rice unchanged.
RAJSHAHYE DIVN.	Thakurgaon ...	0.86	
	12 Rajshahye „ 16, '90	0.16	Weather—seasonable and wet. Prospects of crops so far excellent. Ganges very high, and an inundation is feared.
	Natore ...	1.18	
	Nowgong ...	1.22	
	13 Rungpur „ 16, '90	0.02	Very little rain fell during the week, but the sky is now overcast. Rain is wanted for the young <i>amun</i> , the transplantation of which is hindered by the unusual drought. Jute is being cut and steeped. Owing to over production, prices of jute are low. Sugarcane promises well.
	Nilphamari ...	0.47	
	Kurigram ...	0.18	
	14 Bogra „ 16, '90	1.51	Weather—cloudy and showery, with short intervals of sunshine. Harvesting of <i>aus</i> going on with good outturn. <i>Amun</i> is still being transplanted. Jute is being cut and steeped. All prospects good. Common rice selling at 18½ seers per rupee. Rivers have fallen rapidly.
	Sherpur ...	1.32	
	Nowkhilla ...	1.33	
RAJSHAHYE DIVN.	15 Pubna „ 16, '90	2.04	Weather—cool and cloudy. <i>Aus</i> partially damaged. Prospects of jute and <i>amun</i> continue favourable. Prices of rice have risen a little.
	16 Darjeeling „ 16, '90	3.13	Weather—fine. Jute crop in Terai being cut; estimated outturn 12 annas. <i>Bhadoi</i> rice in ear.
	17 Julpigoree „ 16, '90	1.99	Weather—hot and cloudy with occasional showers. Transplantation of <i>haimanti</i> rice continues. Average outturn of <i>dhadoi</i> rice reported to be 12 annas, and that of jute 10 annas. Prices stationary.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.—concluded.			
Eastern Districts.			
Dacca Divn.	18 Dacca Aug. 16, '90	0.93	Weather—seasonable. Jute and <i>aus</i> being harvested, but they have been damaged to some extent owing to high flood. Rivers falling slowly. <i>Amun</i> paddy thriving. Common rice being sold at from 13 to 15 seers per rupee.
	19 Farreedpur „ 16, '90	1.91	Weather—seasonable. The flood has gone down a little, and the harvesting of <i>aus</i> paddy and jute is in full progress, with an average outturn of 10 annas. <i>Amun</i> plants have been damaged to some extent by the high flood. Fodder is scarce. Price of common rice rising.
	20 Backergunge „ 16, '90	2.28	Weather—seasonable. State of standing crops generally good, but some damage has been done to <i>amun</i> seedlings by floods. Common rice selling at about 13 seers per rupee.
	21 Mymensingh „ 16, '90	1.60	Weather—cloudy with occasional rainfall. Jute has been injured by excessive rain and flood. Outturn of jute expected to be 14 annas, and that of <i>aus</i> paddy 18 annas. Common rice sells at 13 seers 9 chittacks per rupee.
CHITTAGONG DIVN.	22 Chittagong „ 16, '90	3.36	Weather—seasonable. <i>Aus</i> grown to the extent of 12 annas; prospects of this crop fair. Lands are being prepared for <i>amun</i> . Rice selling at 16 seers per rupee.
	23 Noakholly „ 16, '90	6.17	Weather—rainy and cloudy. <i>Aus</i> crop being harvested. Transplantation of <i>amun</i> continues. Prospects fair.
	24 Tipperah „ 16, '90	0.41	Weather—cloudy, hot and muggy. Jute and <i>aus</i> being cut. The recent floods have caused no serious damage to crops. Prospects very promising. Rice selling at from 12 seers 12½ chittacks to 21 seers 5½ chittacks per rupee.
	25 Chittagong Hill Tracts. „ 15, '90	2.78	Weather—cloudy and rainy, with occasional sunshine throughout the week. Early <i>jum</i> paddy ripening. Cotton progressing. Transplanting of plough-paddy in low lands commenced. Common rice being sold at 12 seers 5 chittacks per rupee.
BEHAR.	Hill Tipperah „ 15, '90	2.48	Weather—sultry with occasional showers. <i>Amun</i> being transplanted. <i>Jum</i> paddy being reaped. No change in prices.
	26 Patna „ 16, '90	0.78	Weather—hot and sultry. Transplantation of paddy still going on. <i>Bhadoi</i> crops reported to have been damaged more or less all over the district owing to excessive rain and floods. Prices of food-grains almost stationary.
	Barh „ „	2.0	
	Behar „ „	1.08	
PATNA DIVN.	Dinapore „ „	2.83	
	27 Gya „ 16, '90	1.74	Weather—hot and cloudy. Transplantation of paddy going on. Prospects of <i>bhadoi</i> not favourable. Sugarcane doing well. Prices of food-grains almost stationary.
	28 Shahabad „ 16, '90	1.89	Weather—hot and steamy. Some <i>bhadoi</i> in Sasseram and Bhabuah still left. Paddy prospects good on the whole; but if there be much more rain, paddy seedlings will be washed away too to a great extent. Prices stationary, and falling in Sasseram.
	Buxar „ „	2.11	
	Bhabuah „ „	3.60	
	Sasseram „ „	3.74	
	29 Durbhunga „ 16, '90	0.09	Weather—occasionally cloudy in the latter part of the week. A break in the rains for the last 8 days has done immense good to the <i>bhadoi</i> crops not injured by floods. <i>Aghani</i> rice is being replanted in places where it has been washed away by floods; elsewhere prospects continue very satisfactory. Prices remain stationary.
	Madhubani „ „	1.02	
	Somastipur „ „	0.49	
	30 Mozufferpur „ 16, '90	0.68	Weather—hotter and drier than in the previous week. The prospects of the <i>bhadoi</i> and rice which have not suffered from floods are fair. The damage done by floods is considerable in some localities, but the general <i>bhadoi</i> outturn of the district promises to be better than expected during the recent bad weather.
	Hajipur „ „	0.49	
	Sitamarhi „ „	0.42	
	31 Sarun „ 16, '90	1.10	Weather—finer and hot. <i>Bhadoi</i> crops practically all gone. Continued floods have destroyed nearly all the rice in the Sudder subdivision; elsewhere the rice promises a 12-anna crop. Indigo much damaged by floods.
	32 Champaran „ „	...	Report not received.
	33 Monghyr „ 16, '90	0.58	Weather—hot and close. <i>Bhadoi</i> crops damaged owing to floods and excessive rainfall. Prospects of winter rice good.
	Begusarai „ „	0.79	
	Jamui „ „	2.02	
	34 Bhagulpore „ 16, '90	0.52	Weather—hot with a good deal of sun. Break in the rains beneficial. Some damage done to standing crops by inundation, but on the whole prospects of rice good.
	Banka „ „	1.26	
	Mudhepura „ „	0.61	
	Sopool „ „	0.73	
	35 Purnea „ 16, '90	2.94	Weather—bright and sunny. Break in the rains has done great good. <i>Bhadoi</i> harvest progressing. <i>Aghani</i> transplantation still going on. Indigo manufacture closed with fair results. Floods subsiding except in the south.
	Kishengange „ „	0.37	
	Arrareah „ „	0.50	
	36 Maldah „ 16, '90	0.38	Weather—hot and bright with occasional showers. High east wind prevails. Harvesting of <i>bhadoi</i> continues. About 10 annas of this crop have been damaged by inundation. Transplantation of winter rice is being pushed on. Common rice selling at from 13 to 16 seers per rupee.
	Shibgunge „ „	2.40	
	Gajole „ „	0.50	
	37 Sonthal Pergas. „ 16, '90	1.79	Weather—generally cloudy. Much less rain and more sunshine than last week. This will improve <i>janera</i> prospects. Transplantation of paddy nearly over. Prospect of this crop is very promising everywhere, and with seasonable rain about the end of September, a 16-anna outturn is anticipated; but the <i>janera</i> will not be more than 10 or 12 annas.
	Deoghur „ „	1.22	
	Godda „ „	1.73	
	Jamtara „ „	4.79	
	Pakour „ „	1.67	
	Rajmehar „ „	1.91	

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.			
38	Cuttack Aug. 16, '90	5.33	Weather—seasonable. Rain during the week has much benefited cultivation. Transplantation of <i>sarad</i> nearly over. Prospects of <i>bara beali</i> generally good.
ORISSA DIVN.	39 Pooree „ 14, '90	3.74	Weather—seasonable. Transplanting and weeding of <i>sarad</i> crop going on. <i>Beali</i> in ear. State of miscellaneous crops good. Prices of common rice vary from 18 seers 6 chittacks to 21 seers per rupee in the Sudder subdivision and 21 seers per rupee in the Khoorda subdivision.
	„ Khoorda ...	1.49	
	„ Banpur ...	4.06	
40	Balasore „ 16, '90	3.25	Weather—seasonable. The <i>beali</i> crop suffered somewhat from want of rain last month. Prospects otherwise good. Number of coolies on relief-works 38.
CHOTA NAGPORE.			
South-West Frontier Agency.			
CHOTA NAGPORE DIVN.	41 Hazaribagh Aug. 16, '90	1.99	Weather—seasonable. A break in the rains has set in. Transplanting of paddy about three quarters finished. Indian-corn poor; about 8 annas crop expected. All other crops doing well. Prices more or less stationary.
	42 Lohardugga „ 16, '90	1.59	Weather—warm and cloudy. Transplantation of winter rice still going on vigorously. Prospect of <i>bhadoi</i> continues favourable. <i>Goondli</i> is being cut. Sugarcane in Palamow doing well. Prices steady.
	„ Palamow (up to 11th Aug.)	4.78	
	43 Singbhoom Aug. 16, '90	1.61	Weather—cool, but more rain badly wanted. Rice crop has suffered to the extent of two annas in Chybassa and its neighbourhood. Rain much wanted in these parts. From the remainder of the district seasonable rain reported, and condition of crops said to be favourable. Price of common rice ranges from 12 to 24 seers per rupee.
CHOTA NAGPORE DIVN.	44 Manbhoom „ 16, '90	5.39	Weather—has been favourable to crops. Paddy transplanting is on the point of completion. Prospects generally fair so far. <i>Bhadoi</i> outturn in the Govindpore subdivision will be below the average.
	„ Govindpore ...	2.56

ARUN.																	

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last year. The humidity of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by c and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 15th of August 1890.

					DISTRICT OBSERVATIONS.

Explanation.—..... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, the 19th August 1890.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE
15TH OF AUGUST 1890.**

WEATHER conditions during the past week have remained settled throughout, and the only noticeable features are—

1. A very shallow depression formed in the north-west corner of the Bay about the beginning of the week, and though wind velocity hardly increased, it was accompanied by a very local cyclonic circulation of winds, and seems to have had considerable influence on the rainfall distribution.

2. Pressure has generally been slightly below the normal, the deficient distribution being due to the passage of the low-pressure area over the province.

3. Temperature has been above the normal in North Bengal, Behar, and Assam, normal in East Bengal, and below elsewhere.

4. Rainfall has been very deficient in North Bengal and North Behar, considerably below the normal in East Bengal, slightly below in South-West Bengal and South Behar, and above in Orissa and Chutia Nagpur.

At the commencement of the week pressure distribution was very nearly normal, and a steady slow fall was general, the changes being above a twentieth of an inch in the north-east corner of the Bay. The normal circulation of winds prevailed, except that easterly winds were blowing over the whole of South-West Bengal and Chutia Nagpur. This shewed that the current of air was being deflected more to the west than usual, and to this may be due the fact that for the greater part of the week very little rain has fallen at the northern stations. On the 10th a brisk fall of pressure occurred in the north-west corner of the Bay, and though defect of rather more than a twentieth of an inch was general over the northern half of the Bay, and a smaller defect over Bengal, a cyclonic circulation of winds obtained in Lower Bengal. General rain was falling in Orissa and East Bengal and some of the central districts, but elsewhere only scattered showers were being reported. On the 11th the shallow depression was over the centre of Bengal, and westerly winds had commenced in the south-western districts, while rainfall had become much more general in all districts. After this the low pressure area slowly drifted in a westerly direction, being over parts of Chutia Nagpur, South Behar, and South-West Bengal on the 12th, over Chutia Nagpur and South Behar on the 13th, in the North-Western Provinces on the 14th. Rain continued to fall at all stations in Orissa till the 12th, in South-West and East Bengal, Chutia Nagpur, and South Behar till the 13th, but in North Bengal and North Behar the 11th was the only day of the week on which fairly general rain was received, except in Pubna, Bogra, Rajshahye, and Maldah, where the distribution was similar to that in the southern districts.

Pressure—Has generally been below the normal in consequence of the low pressure area within which defect was a little over a twentieth of an inch, having moved first from the head of the Bay into Central Bengal, and thence in a westerly direction over Chutia Nagpur and South Behar. Defect in mean pressure is therefore greatest in South-West Bengal, Chutia Nagpur, and South Behar, where it averages .03 inch, while in the other districts it is smaller and rarely over .01 inch.

Temperature—Changes have generally been small, and the differences from the normal very slight in South Behar and East Bengal. There has been a small excess in North Bengal and North Behar throughout the week, and a similarly steady defect in Orissa and Chutia Nagpur. A steady rise was fairly general in the northern districts on the 9th and 10th; but as rainfall extended over the province, a fall occurred in all districts on the 11th and 12th, after which a slow rise prevailed, first in the eastern districts, and then over the whole province, till the end of the week. Mean excess amounts to 1.5° in Assam, 1.3° in North Behar, and .9° in North Bengal, while defect is 1.5° in Chutia Nagpur and .9° in Orissa.

Rainfall—Has been general in Lower Bengal during the greater part of the week, and very scattered in the northern districts. The average fall in Orissa is .7 inch above the normal and in Chutia Nagpur .4 inch, and though falls in the other districts have been all deficient, the difference from the normal is small in South-West Bengal and South Behar. The falls in East Bengal, North Bengal, and North Behar are, however, considerably below the normal, as shown by the following numbers which give the percentage of the normal fall for the week:—North Bengal 27, North Behar 14, East Bengal 62.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 15th of August 1890:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.

The mean pressure of the seven days ... 29.585
 The average pressure of the corresponding period for 24 years, S.-G.'s Office ... 29.590

The total number of hours of bright sunshine ... 31.1
 The maximum possible number of hours of sunshine ... 90.4

The mean temperature of the seven days ... 82.3
 The average temperature of the corresponding period for 24 years, S.-G.'s Office ... 83.1
 The extreme variation of temperature ... 12.6
 The maximum temperature ... 88.6

The highest velocity of the wind in one hour ... 13

The highest pressure of wind on one square foot ... Not measurable.

The mean relative humidity ... 88

The average relative humidity of the corresponding period for 24 years, S.-G.'s Office ... 86

The total fall of rain from 10th to 16th August 1890 ... 2.34

The average fall of the corresponding period for 24 years, S.-G.'s Office ... 3.85

The total fall from 1st January to 16th August 1890 ... 36.59

The average fall of the corresponding period for 24 years, S.-G.'s Office ... 42.29

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph. The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; t, thunder; p, passing temporary showers.

J. H. GILLILAND,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
 Calcutta, the 18th August 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 2nd August 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 2nd August 1890, in twenty-seven principal towns of Bengal, correspond to an annual rate of 15·3 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 6·6 lower than the average rate of the corresponding week of the past five years, and is also lower than the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885—89.	1890.
Ratio of births per 1,000 of the population per annum	25·7	21·5	23·8	19·4	19·2	21·9	15·3

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Dacca	9·7	15·6	9·7	11·0	Total	18·2	19·1	18·2	15·3

It will be seen that last week the highest birth-rate was returned from Rampore Beaulah (31·5), and the lowest from Chittagong (4·7).

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 19·2 per 1,000 of the population. The rate of the week is 13·6 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885—89.	1890.
Ratio of deaths per 1,000 of the population per annum	44·1	28·2	40·3	22·6	20·0	38·8	19·2

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population :—

TOWNS.	WEEKS ENDING—				TOWNS.	WEEKS ENDING—			
	12th July 1890.	19th July 1890.	26th July 1890.	2nd August 1890.		12th July 1890.	19th July 1890.	26th July 1890.	2nd August 1890.
Burdwan	22·9	19·8	27·5	19·8	Narainganj	24·5	16·6	16·8	16·6
Midnapore	23·2	35·6	17·0	7·7	Chittazong	39·9	18·8	18·8	11·7
Hughli and Chinsurah	21·3	19·7	24·6	26·3	Comillah	26·9	26·9	35·5	20·9
Serampore	29·4	45·1	39·3	51·0	Patna City	14·9	14·6	18·8	13·0

Howrah	11·5	16·0	13·7	10·9	Arrah	35·9	23·9	39·5	8·4
Pali	3·5	7·0	21·1	14·0	Mozufferpore	31·6	29·2	32·8	15·8
Krishnagar	3·8	5·8	11·4	5·7	Darbhanga	23·6	32·3	25·2	14·5
Ranaghat	18·0	24·0	12·0	24·0	Chupra	21·1	16·1	18·1	11·1
Santipore	8·8	17·5	15·8	17·5	Rhagulpore	15·4	10·0	22·6	14·5
Jessore	30·6	42·8	12·2	12·2	Monghyr	25·3	26·2	25·3	15·4
Rampore Beaulah	10·5	5·2	23·6	18·8	Purneah	13·9	10·4	10·4	13·9
Darjiling	22·2	37·0	22·2	58·9	Poori	65·0	44·1	35·7	32·6
Dacca	15·6	23·4	15·6	27·2	Total	31·4	22·0	23·1	19·2

It will be seen that last week the highest mortality occurred in the town of Darjiling (88·9), and the lowest in Krishnagar (5·7).

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follows:—

<i>Cholera.</i>		<i>Fever.</i>		<i>Other causes.</i>	
	Ratio per mille.		Ratio per mille.		Ratio per mille.
Santipore ...	10·5	Darjiling ...	44·5	Gya ...	21·2
Arrah ...	4·8	Comillah ...	23·1	Serampore ...	17·7
Chupra ...	4·0			Poori ...	16·8
Dacca ...	3·9			Dacca ...	11·7
Durbhanga ...	3·9			Hughli and Chinsurah ...	11·5
Gya ...	2·7				
Patna City ...	2·6				

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 2·1 from cholera, against 3·3 per 1,000 in the preceding week; ·04 from small-pox, against ·1; 7·4 from fever, against 10·2; 2·4 from bowel-complaints, against the same ratio; ·8 from injury, against ·9; and 6·4 from other causes, against 6·2 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows:—

<i>According to Sex.</i>		<i>According to Class.</i>		<i>According to Age.</i>	
	Ratio per mille.		Ratio per mille.		Ratio per mille.
Males ...	21·0	Christians ...	44·8	Under 1 year ...	159·8
Females ...	17·3	Hindus ...	19·1	1 and under 5 years ...	26·9
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	121	Mahomedans ...	19·1	5 " 10 " ...	11·3
				10 " 15 " ...	10·3
				15 " 20 " ...	8·4
				20 " 30 " ...	11·1
				30 " 40 " ...	13·1
				40 " 50 " ...	15·4
				50 " 60 " ...	16·8
				60 years and upwards ...	46·7

Detailed information regarding the vital statistics of the twenty-seven towns dealt with in the above review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,

Sanitary Commissioner for Bengal.

The 18th August 1890.

Statement showing the Results of the Registration of Births and Deaths in the principal Municipalities in Bengal during the week ending with Saturday, the 2nd August 1890.

General remarks on the fluctuation of principal staples carried over the East Indian Railway during month ended 26th July 1890.

INCREASES.

Cotton.—This is a continuation of the increase previously reported, and was chiefly in despatches from the Bombay, Baroda and Central India Railway *via* Agra to Howrah for export.

Turneric.—Chiefly in despatches from Howrah to Cawnpore and Delhi.

Wheat.—The improvement in this commodity was in despatches from stations on the "R" and "B" districts to Howrah for export to London.

Lac.—The increase appears chiefly in despatches of shell-lac from Mirzapur to Howrah for export to Europe; also in lac refuse to the Port Commissioners' railway and to stations on the Tirhoot State Railway.

Ghee.—Chiefly in long distance despatches from stations on the "D" district to Howrah for local consumption.

Stone.—The increase recorded under this head was principally in despatches of stone ballast from Pakur to Chitpore, Sealdah, Howrah and other stations.

Bones.—Principally in despatches from Digba Ghât *via* Digba Ghât, *via* Mogulserai and Agra to Bally and Chitpore.

Potatoes.—Chiefly in despatches from Patna City to Howrah and Seoraphuli for local consumption.

DECREASES.

Coal and coke, up and down.—The falling off was chiefly in upwards coal for the Bombay, Baroda and Central India, the North-Western, and the Bengal and North-Western Railways owing to decreased demands from those lines. The decrease in the downwards traffic is attributable to less exports to coast ports.

Piece-goods, European.—This falling off appears chiefly in despatches from Howrah and from Bombay *via* Jubbulpore, and was due to the fluctuation in exchange unsettling the market.

Gunny.—Following the falling off in the export trade.

Rice (husked and unhusked).—This decrease, as reported in previous months, was due entirely to the falling off of despatches of upward consignments sent from stations on the "A" and "R" districts last year.

Other grain and spring crops.—As stated in previous months, the falling off recorded under this head was due to the unusually heavy traffic in cheap food-grains last year from stations on the "B" district to stations on the Tirhoot State Railway owing to scarcity of food-grains in Tirhoot.

Brass and copper.—Chiefly in despatches from Howrah owing to demand being very dull during the period under review.

Railway material, Foreign.—The falling off was chiefly in despatches from Howrah to Katni, Umaria, and Umballa.

Salt.—The decrease in this staple appears chiefly in despatches of imported salt from Howrah to stations on the Tirhoot State and the Bengal and North-Western Railways owing to heavy rains up-country.

Seeds.—Chiefly in linseed to Howrah for export; also in mustard-seed to Howrah and other stations for local consumption.

Sugar (refined).—The falling off was principally in despatches from the Shahabad district to Howrah, Cawnpore, Agra and to stations on the Jubbulpore line, the Great Indian Peninsula and the Bombay, Baroda and Central India Railways.

Tobacco.—Chiefly in despatches from Barh and stations on the Tirhoot State Railway to Cawnpore, Jubbulpore and stations on the Great Indian Peninsula Railway.

EMIGRATION FROM THE PORT OF CALCUTTA DURING THE YEAR 1889.

GENERAL DEPARTMENT—COLONIAL EMIGRATION.

Calcutta, the 15th August, 1890.

RESOLUTION.

READ—

The Report on Emigration from Calcutta during the year 1889.

Read again—

The Report on Emigration from Calcutta during the year 1888.

DURING the past year colonial emigration from Bengal has been marked by an unusual activity, arising from the fact that the colonies have now been obliged to make up for the small importation of labour caused by the uncertainty of the sugarcane industry in the preceding years. The increased demand is not, however, regarded by the Protector as indicative of any probable revival of the industry. The requisitions in the year 1889 amounted to 9,945 as against 7,180 in 1888, the increase of 2,765 being attributed generally to the cause above mentioned, and more particularly to the re-opening of emigration to the colonies of Natal and Mauritius, which did not indent for coolies during the previous year. The larger requisitions gave rise to an increase in the number of recruiters from 511 to 717, and in the number of registrations from 10,325 to 16,813, the excess being, roughly speaking, divided proportionately among the more important of the recruiting districts. The number of adults actually despatched was 10,041, against 6,544 in 1888 and 4,563 in 1887. The two leading districts of Shahabad and Benares maintained their places on the list, the former having supplied 2,630, and the latter 2,085 registrations. The district of the 24-Pergunnahs, which shows on paper the largest number of registrations, cannot be compared with the others, owing to the fact that a large proportion of the

recruiting in that district is carried on among coolies brought to Calcutta by unlicensed emigration agents under pretence that they are destined for Assam. The Lieutenant-Governor agrees with the Protector that this practice is objectionable, inasmuch as it is a breach in spirit of the Colonial Emigration Act, which provides for all emigrants being registered for the colonies in the district of recruitment. It does not appear, however, that under the law, as it at present stands, there is any means of remedying the evil. The question is under consideration in connexion with the amendment of the Inland Emigration Act (Act I of 1882), which is now before this Government and the Government of India.

2. The standard attained in the management of the depôts in Calcutta has, with the single exception of the Mauritius depôt at Bhowanipore, been all that could be desired, both with a view to the sanitary arrangements and to the comfort of the emigrants while awaiting embarkation. The slight increase in the rates of depôt sickness and mortality was not more than would naturally follow on a much increased depôt population. The Mauritius depôt was only re-opened during the course of the year, and is described by the Medical Inspector as wanting in space for exercise, and so much shut in on all sides that free ventilation and perflation of air are deficient, although the regulations as to cubical and superficial area were literally complied with, and the Lieutenant-Governor is pleased to learn that the depôt will very shortly be abandoned and a more convenient site selected on the river bank at Garden Reach. The frequent occurrence of sickness, especially measles, in the Bhowanipore depôt, had much to account for both in increasing the general average mortality and in causing delay in the departure of emigrant ships.

3. During the year under report 21 vessels left Calcutta for various colonies, of which five were steamers bound either to Natal or Mauritius. In every case the women carried were in excess of the prescribed number, and it is noticed with satisfaction that in the case of Surinam more than half of the women embarked were married. The mortality on the voyages, though showing a slight increase in the average, calls for no particular notice. Careful enquiry is made in each case in which the result of the voyage seems to indicate unusual sickness.

4. Fivethousand one hundred and two emigrants were reshipped from the different colonies as against 3,908 in the preceding year. Of these 109, or a percentage of 2·14, died on the voyage—a percentage which the Lieutenant-Governor agrees with the Protector in considering moderate, looking to the age and decrepit condition of many of the returning emigrants. The Protector has been requested in future reports to notice particularly the question of the return of lepers from the colonies, and has been at the same time instructed to use great care in preventing the despatch as emigrants from Calcutta of any person open to the slightest suspicion of incipient leprosy. From correspondence subsequent to the report now under review it appears that no less than 38 lepers were returned from the colonies during the year 1889, of whom 18 came from Demerara and 12 from Mauritius. The Lieutenant-Governor is not inclined to accept the position that colonies should be allowed to return emigrants who have contracted the disease during the period of their expatriation.

5. The administration of the estates of deceased emigrants, which now forms an important part of the work of the Protector's office, has been carried on with diligence and patience, with the result that enquiries for heirs were completed in 257 cases, or 67·1 per cent. of the number of estates under administration during the year. The Lieutenant-Governor agrees with the Protector that it is most important that these enquiries should be instituted as soon as possible after the death of the emigrants, and that the Protector should be put in possession of the information on which to conduct the investigation without any unreasonable delay. It is also very desirable that the estates of those whose heirs have been traced should be made over to the Protector with the greatest possible promptitude.

6. The thanks of the Lieutenant-Governor are due to Surgeon-Major D. W. D. Comins for the manner in which he has carried out his duties as Protector of Emigrants; to Surgeon-Major J. F. P. McConnell, who held the position of Medical Inspector, and to Dr. R. C. Chandra, who officiated for Dr. Comins from July to October.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

**RESOLUTION ON THE REPORT ON THE LEGAL AFFAIRS OF THE
GOVERNMENT OF BENGAL FOR THE YEAR 1889-90.**

RESOLUTION.

JUDICIAL.

Dated Calcutta, 25th August 1890.

READ—

The Report on the Legal Affairs of the Government of Bengal for the year 1889-90.

Read also—

The Reports for the two preceding years, and the orders of Government thereon.

At the close of the year 1888-89 six appeal cases were pending before the Privy Council. Of these only two were decided—one against the Government in which the Secretary of State was the appellant, and one in favour of the Court of Wards as the respondent. One case was dismissed, the subject-matter of the dispute having been amicably settled between the parties themselves in this country. Only one appeal was instituted before the Privy Council during 1889-90, but as it was admitted late in the year, the papers of the case are not yet ready. The Secretary of State is respondent in this case.

2. The following statement shows the result of civil litigation in all the Courts of Bengal to which Government was a party during the year 1889-90 as compared with the two preceding years:—

	Original cases.			APPEALS.						Total.		
				Before High Court.			Before Lower Courts.					
	1887-88.	1888-89.	1889-90.	1887-88.	1888-89.	1889-90.	1887-88.	1888-89.	1889-90.	1887-88.	1888-89.	1889-90.
Decided in favour of Government	344	289	254	118	23	50	62	26	44	524	338	348
Ditto, against ditto	56	130	51	3	1	13	19	6	79	155	58
Compromised, remanded, or withdrawn	83	55	39	1	5	5	2	4	89	57	48
Percentage in favour of Government (omitting fractions)	86	69	83	98	100	98	83	58	88	88	69	86

The Legal Remembrancer explains that of the 58 cases decided against Government, 26 were land acquisition cases, in which the Collector's offer was slightly varied by the Judge on reference. Leaving these cases out of calculation, the percentage in favour of Government would be 87 in 1887-88, 66 in 1888-89, and 86 in 1889-90. The results of litigation in the High Court and the lower Appellate Courts do not seem to call for notice. In the Courts of first instance 51 cases were decided against Government, and the percentage of cases decided in favour of Government is 83, against 86 in 1887-88 and 69 in 1888-89. Omitting land acquisition cases, the percentages would be 75 in 1887-88, 65 in 1888-89, and 81 in 1889-90.

3. The Legal Remembrancer reports that the only case of any importance decided against Government was that of Messrs. Watson and Company, in which they sued to recover possession of 284 bighas of land. They asserted that their *zemindari* and *putni* mehals, situated on the left bank of the river Howlia, were diluviated in 1272 B.S. and re-appeared on the original site in 1281 B.S., when it was included in the contiguous mehal Chur Kadipur and settled with Rani Brojosundari Debi. Limitation was pleaded on the part of Government, and it was also urged that, as the plaintiffs did not raise any objection when the land was settled, they must, in the event of their establishing their title to the land, wait for possession until the expiration of the term of settlement. The Court, however, overruled the plea of limitation and, having found on local enquiry that the greater portion of the land in dispute was a re-formation of the old site of the plaintiffs' mouzahs Dharmadaha and Tekulia, gave a modified decree to the plaintiffs. It was not considered necessary to prefer an appeal against this decision.

4. The following figures show the result of the litigation in which the Court of Wards was concerned for the year under report as compared with the two preceding years:—

	Original cases.			APPEALS—					
				Before High Court.			Before Lower Courts.		
	1887-88.	1888-89.	1889-90.	1887-88.	1888-89.	1889-90.	1887-88.	1888-89.	1889-90.
In favour of Court of Wards	663	745	514	10	11	14	35	62	56
Against Court of Wards	76	82	49	...	4	...	199	24	13
Compromised, remanded, or withdrawn	60	33	42	5	...	2	3	10	10
Percentage in favour of Court of Wards (omitting fractions)	90	90	92	100	74	100	25	7	85

It is explained that the decrease in the number of cases is due to a falling off in the number of original suits on behalf of the Burdwan Raj in the districts of Burdwan, Birbhum, and Bankura, and of two other estates, one in Tipperah and the other in Hazaribagh.

In all the cases in the High Court the Court of Wards was respondent. In six of those in which the Court of Wards preferred appeals unsuccessfully in the lower Appellate Courts, and in 41 out of 49 of the cases decided against the Court of Wards in original suits, action had been taken without previous communication with the Legal Remembrancer. It is not stated how many of the successful cases had been similarly undertaken by the local authorities on their own responsibility.

5. The figures below show the amount of Government decrees recovered during 1889-90 as compared with the two preceding years:—

	1887-88.	1888-89.	1889-90.
	Rs.	Rs.	Rs.
Amount under realization	48,884	67,540	55,247
Realized during the year	11,389	30,281	11,659
Percentage of recovery	23½	44½	21½

No explanation has been given of the great falling off in the percentage of recovery, but details are given by the Legal Remembrancer to show that measures for the recovery of outstanding amounts are being taken in all districts, and it is further said that a large portion of the balance will have to be written off, all attempts to realize having proved unsuccessful. Only Rs. 760 were remitted during the year.

6. The following table shows the amount of wards' decrees recovered during the year as compared with the two previous years:—

	1887-88.	1888-89.	1889-90.
	Rs.	Rs.	Rs.
Amount under realization	13,20,600	13,94,090	11,74,880
Realized during the year	2,59,312	2,68,027	2,15,720
Percentage of recovery	19½	19¼	18½

7. The largest outstanding balances are noted in the margin. In many instances it is reported that considerable sums are irrecoverable, and if this be the case, the amounts should be reported for remission at an early date. Recent collections on the Burdwan Raj Estate are said to be encouraging, and special arrangements have been made by the Board of Revenue for the realization of the balance due on the estate of the three younger Dighapatia wards.

No information is forthcoming at present as to the very large balance reported from the Tikari Estate, and the Lieutenant-Governor would be glad to have a special report on the subject. His Honor would be glad also to hear what action has been taken on the special reports called for by the Legal Remembrancer on this subject in 1888-89, as the percentage of collections generally is far from satisfactory.

8. The Lieutenant-Governor's acknowledgments are due to Mr. Allen for his management of the department under his charge.

By order of the Lieutenant-Governor of Bengal,

C. C. STEVENS,

Offg. Chief Secy. to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 23rd August, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
<i>Western Districts.</i>			
BURDWAN DIVN.	1 Burdwan Aug. 23, '90	0.04	Weather—cloudy and hot. Transplantation nearly over. Prospects good.
	Culina ...	0.48	Prices of common rice:—
	Cutwa ...	0.72	Srs. ... 15½
	Ranigunge ...	1.38	Culina ... 14 } per rupee.
			Cutwa ... 14½
			Ranigunge ... 16
	2 Bankoora „ 23, '90	1.35	Weather—cloudy with occasional light showers and sunshine. Rain wanted in some places. Prospects of crops good. Common rice selling at 19 seers per rupee at Sudder and 18½ seers at Bissenpore.
	3 Birbhum „ 23, '90	1.90	Weather—seasonable. The break in the rains has been good for the crops, which are most excellent. Prices of common rice continue to be from 16 to 18 seers per rupee.
	Rampore Haut ...	2.86	
	4 Midnapur „ 23, '90	0.50	Weather—now cloudy. More rain required generally throughout district. Prospects fair. Prices of common rice:—
PRESIDENCY DIVN.			Srs. Ch. ... 16 0
			Sudder ... 16 0 } per rupee.
			Contai ... 14 3
			Tumlook ... 15 3
			Ghatal ... 15 3
	5 Hooghly „ 23, '90	1.01	Weather—cool and seasonable. Reports as to state and prospects of crops are generally very favourable. Prices of common rice:—
	Serampore ...	0.50	Srs. ... 13
	Jehanabad ...	0.06	Serampore ... 16 } per rupee.
			Jehanabad ... 15
	Howrah „ 23, '90	1.31	Weather—seasonable. Transplanting of <i>amun</i> not yet finished. Crops generally doing well. Price of common rice 13 to 14 seers per rupee.
RAJSHAHY DIVN.		0.25	Uluberia ...
	<i>Central Districts.</i>		
	6 24-Pergha Aug. 23, '90	1.51	Weather—hot and cloudy with occasional light showers. <i>Aus</i> and jute are being cut. Transplantation of <i>amun</i> still continues. More rain wanted in places. Prices stationary.
	7 Nuddea „ 23, '90	0.62	Weather—seasonable. Harvesting of <i>aus</i> paddy going on. Paddy on low lands mostly destroyed by floods.
	Kushtea ...	1.4	
	Meherpore ...	0.94	
	Chudanga ...	1.54	
	Ranaghat ...	1.44	
	Khoolna „ 23, '90	1.33	Weather—rainy. Prospects of crops continue good. Transplantation of <i>amun</i> going on. Rivers have risen higher than usual.
	Bagirhat ...	2.79	
RAJSHAHY DIVN.	Satkhira ...	0.33	
	Jessore „ 23, '90	0.64	Weather—hot with occasional light showers. <i>Aus</i> harvesting going on. Rivers rising up, and crops on low lands are being submerged.
	Jhenidah ...	1.25	
	Magura ...	1.04	
	Narail ...	1.38	
	Bongong ...	1.05	
	Moorshedabad „ 23, '90	4.22	Weather—hot with occasional heavy showers. River imperceptibly falling down; the gauge stood this noon (23rd) 30' 8". Four annas outturn of <i>dhadoi</i> crop reported from the Jungipore subdivision. General outturn of this crop expected to be much less than usual. Prospects of standing crops on the whole good. <i>Amun</i> thriving well.
	11 Dinagepur „ 23, '90	5.78	Weather—seasonable. Harvesting of jute and <i>dhadoi</i> still going on. Prospects of <i>haimanti</i> paddy very favourable. Transplantation of <i>haimanti</i> not yet finished. Price of rice stationary.
	Thakurgaon ...	5.0	
	12 Rajshahye „ 23, '90	2.28	Weather—rainy and seasonable. State and prospects of crops good in Nattore and Nowgong; but the inundation is seriously affecting the standing crops in nearly all thanas of the Sudder subdivision; it is too early to estimate the damage that may have been caused.
RAJSHAHY DIVN.	Nattore ...	2.74	
	Nowgong ...	1.37	
	13 Rungpur „ 23, '90	7.04	Weather—cloudy with occasional showers. The rain has been beneficial to <i>amun</i> which is being transplanted. Sugarcane promising well.
	Nilphamari ...	9.91	
	Kurigram ...	5.17	
	Gaibanda ...	0.89	
	14 Bogra „ 23, '90	3.59	Weather—rainy and cloudy with south-easterly wind. Condition of sugarcane, <i>aus</i> , and <i>amun</i> good. <i>Aus</i> and jute are being cut. Common rice is being sold at 18½ seers per rupee.
	Sherpur ...	3.93	
	Nowkhilla ...	2.87	
	15 Pubna „ 23, '90	2.56	Weather—cool and cloudy. The continual rise of the rivers has caused partial damage to the jute, sugarcane, <i>aus</i> , and <i>amun</i> crops. Prices stationary.
RAJSHAHY DIVN.	16 Darjeeling „ 23, '90	9.10	Weather—very rainy again. Winter rice is being transplanted in the Terai.
	17 Jalpigoree „ 23, '90	17.22	Weather—rainy and cloudy. Harvesting of <i>aus</i> paddy going on. Jute is being cut in places. Transplantation of <i>haimanti</i> paddy continues. Prices stationary.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—concluded.			
Eastern Districts.			
Dacca Divn.	18 Dacca Aug. 23, '90	2.19	Weather—cloudy with gleams of sunshine at intervals. Jute and <i>aus</i> paddy being harvested. <i>Amun</i> paddy thriving. Rivers rising again slowly. Fodder is not available in abundance. Common rice 13 to 15 seers per rupee.
	19 Furreedpur „ 23, '90	5.26	Weather—seasonable. In the Goalundo subdivision, where the water has not risen very high, <i>aus</i> rice is nearly all gathered with a good outturn; and the state of <i>amun</i> continues fair. Sugarcane, however, has been partially damaged by caterpillars. In the Sudder and Madaripore subdivisions the water is again rising. About eight annas of <i>aus</i> paddy have been damaged, but the prospect of <i>amun</i> paddy continues fair. Fodder is scarce, and cattle are suffering in consequence. Common rice is selling at 12 seers a rupee at its cheapest.
	20 Backergunge „ 23, '90	2.31	Weather—seasonable. Rainfall in the district has been very divergent, in Perozpur only .97 of an inch, and in Bhola and Patuakhali 4.28 and 5.49 inches respectively. State of standing crops generally good, but some damage has been done both to the <i>aus</i> crop and the <i>amun</i> seedlings by rise of water. Common rice selling at about 13 seers per rupee.
	21 Mymensingh „ 23, '90	4.00	Weather—rainy and cloudy with occasional sunshine. <i>Aus</i> and jute are still being harvested. Transplantation of <i>amun</i> is nearly completed. Common rice selling at 13½ seers per rupee.
CHITTAGONG Divn.	22 Chittagong „ 23, '90	2.18	Weather—seasonable. Transplanting of <i>amun</i> and reaping of <i>aus</i> paddy commencing. <i>Aus</i> damaged on low lands by recent heavy rain. Rice selling at 16 seers per rupee.
	23 Noakholly „ 23, '90	5.88	Weather—rainy. Sunshine is scarcely seen. Harvesting of <i>aus</i> going on. <i>Amun</i> is being transplanted. Price of <i>amun</i> rice 13 seers and of <i>aus</i> rice 15 and 16 seers per rupee at Feny subdivision.
	24 Tipperah „ 23, '90	4.67	Weather—seasonable; frequent showers; cool and cloudy. Three-fourths of <i>aus</i> crop reaped. <i>Amun</i> thriving. Half of the jute crop cut in the Sudder subdivision. Prospects of standing crops continue good. Prices stationary.
	25 Chittagong Hill Tracts „ 21, '90	0.79	Weather—cloudy with occasional sunshine and rain throughout the week. Harvesting of early <i>jum</i> paddy continues. Cotton progressing. Transplanting in low lands continues. Common rice being sold at 12 seers 15 chittacks per rupee.
BEHAR.	Hill Tipperah „ 22, '90	1.64	Weather—seasonable. Transplanting of <i>amun</i> still going on. Prospects of jute and sugarcane not favourable. <i>Jum</i> crops doing well.
PATNA Divn.	26 Patna „ 23, '90	4.54	Weather—cloudy and showery. Transplantation of paddy going on vigorously. Sugarcane doing well. Prospects of <i>bhadoi</i> crops not good, much injury having been done by excessive rain and floods. Prices of food-grains almost stationary.
	27 Gya „ 23, '90	7.01	Weather—rainy and cloudy. Paddy transplantation almost finished. <i>Marua</i> being harvested in places. Sugarcane doing well. Prices of food-grains almost stationary.
	28 Shahabad „ 23, '90	2.16	Weather—hot and some wet days. <i>Bhadoi</i> almost all gone in Sudder and Buxar; some still left in Sasseram and Bhabuah. Paddy prospects good. Prices stationary; rice slightly risen in Arrah.
	29 Durbhunga „ 23, '90	2.39	Weather—cloudy with occasional rain. Prospects of <i>bhadoi</i> crops not injured by floods continue favourable. <i>Aghani</i> rice is still being replanted in places where it has suffered from flood. Indigo manufacture not yet over. Prices remain almost stationary.
BHAGULPORE Divn.	30 Mozufferpur „ 23, '90	2.28	A good deal of rain during the week, and it was raining at the time of report. Paddy being retransplanted on some of the lands previously inundated. Condition of <i>makai</i> and rice not injured by floods satisfactory.
	31 Sarun „ 23, '90	4.49	Monsoon weather. <i>Bhadoi</i> crop is almost a total failure on account of the flood. Rice is a complete failure over one-fourth of the district, but elsewhere it is about a 12-anna crop. Indigo prospects poor.
	32 Chumpann Bettiah „ 23, '90	1.64	Good showers of rain last night (22nd); clouds still hanging in the sky, threatening more rain. Prospects of <i>makai</i> very poor from the effects of flood and excessive rainfall of the past weeks. Slight damage to paddy also reported from some parts, but the crop generally is doing well and is in good condition.
	33 Monghyr „ 23, '90	3.85	Weather—hot and sultry with occasional rainfall. Transplantation of winter rice nearly finished. Harvesting of <i>bhadoi</i> crops still going on in places in the Beguserai subdivision.
BHAGULPORE Divn.	34 Bhagulpore „ 23, '90	5.2	Weather—cloudy with a good deal of rain. <i>Marua</i> , <i>khéri</i> , and <i>janera</i> are being reaped, but a good deal of the crops on low lands destroyed by floods. Prospects of rice crop good.
	35 Purneah „ 23, '90	4.35	A good deal of rain with occasional sunshine. <i>Aghani</i> transplantation continues. <i>Bhadoi</i> harvesting going on. Steeping of jute begun. Rivers falling.
	36 Maldah „ 23, '90	7.18	Heavy showers with changeable winds. In the centre and south of the district a great deal of the <i>bhadoi</i> crop has been damaged by inundation. The jute and rice crops around Kharba and Chanchal are splendid, and the latter has been benefited by the copious rainfall. Common rice selling at from 12 to 18 seers a rupee.
	37 Sonthal Pergah „ 23, '90	7.00	Weather—seasonable. <i>Makai</i> damaged a good deal by rain. In Deoghur only four annas crop expected; elsewhere ten or twelve annas crop. Rice prospects excellent, but of course depend greatly on September rainfall.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.			
ORISSA DIVN.	38 Cuttack Aug. 23, '90	1.60	Rainfall during the week has been insufficient. <i>Satika beali</i> is being gathered. In the Dhamsala thana of the Jajpur subdivision <i>guru beali</i> is withering for want of sufficient rain. In the Tirtol thana of the Sudder subdivision <i>sarad</i> paddy has in some places been attacked by an insect locally known as <i>soonamukhi</i> . General prospects fair.
	39 Pooree „ 1, '90	2.26	Weather—seasonable. Pulling and weeding of the <i>sarad</i> crop are in progress. <i>Beali</i> is beginning to ripen. Miscellaneous crops are doing well. Prices of common rice vary from 18 seers 6 chittacks to 21 seers per rupee in the Sudder subdivision.
	40 Balasore „ 23, '90	1.59	Weather—cool and cloudy. Prospects of rice crop generally good, but more rain urgently needed, especially in Bhuddrak subdivision. Number of coolies on relief-works 27.
CHOTA NAGPORE.			
<i>South-West Frontier Agency.</i>			
CHOTA NAGPORE DIVN.	41 Hazaribagh Aug. 23, '90	3.96	Weather—seasonable. Ample rain all over the district. Transplanting of paddy nearly completed in most places. Prospects very good. <i>Bhadoi</i> crops, particularly Indian-corn, greatly damaged by excessive rain. Prices more or less stationary.
	42 Lohardugga „ 23, '90	1.34	Weather—warm and cloudy. Transplantation of winter rice still going on. Prospect of <i>bhadoi</i> good. <i>Goondli</i> is being reaped. Prices steady.
	43 Singbhoom Aug. 23, '90	0.42	Rain holding off in greater part of the district. Weather cloudy and cool. Damage is being done to the rice crop on the “bera” lands by the break in the rains. Rain is badly wanted in all parts but Monorpore and Bharagoora. Indian-corn is a full crop, and other <i>bhadoi</i> crops are yielding fully.
	44 Manbhoom „ 23, '90	2.03	Weather—seasonable. Prospects of winter rice crop generally favourable. <i>Bhadoi</i> crop is not up to the average, and from Govindpur it is reported to be a failure.

Published for general information.

Explanation.—.....indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, the 26th August 1890.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE
22ND OF AUGUST 1890.**

SETTLED conditions have again prevailed throughout the week, the only notable features of the weather being—the rainfall distribution, which has been the reverse of that of the previous week, viz., scanty in the southern districts and heavy in North Bengal and Behar, and two very shallow depressions which formed, one in the centre of the Bay on the 16th, and the other in the north-west corner on the 19th, both, however, disappearing within a day or two of their first appearance.

Pressure has generally been above the normal and changes very small, but as excess in the west of the Bay was about a tenth of an inch during the latter half of the week, gradients have been steeper than usual, and a moderately strong monsoon current has been steady over the eastern and northern districts of the province. The rainfall in East Bengal has been practically normal, and the rather excessive rain in North Bengal and Behar may be due to the westerly winds blowing in these districts from the 17th to 19th and again on the 22nd. The heaviest rain fell when directions were undergoing change, that is about the 17th, the 20th, and the 22nd, and then pressure was either low or uniform over Bengal, and air motion had probably a larger vertical component than with a normal distribution of pressure. On the 16th there was a widely diffused low-pressure area over the centre of the Bay within which a slight defect obtained, while round the coast there was generally excess of about a twentieth of an inch. The depression extended over part of the Circars and as far east as the Burmah coast, but on the following day, owing to a slow rise of pressure, it had disappeared, a faint cyclonic whirl remaining in South Orissa and the Circars and a ridge of relatively high pressure running east and west over Lower Bengal and the head of the Bay. Squally weather probably occurred during these days in the centre of the Bay, as the sea was rough, first in Burmah and then on the Circars and Orissa coast, and wind velocity rose somewhat at the head of the Bay, but even when strongest it was very little above the average and never worse than a fresh breeze. On the 18th a brisk fall of pressure occurred at Saugor Island and Calcutta, and a slow fall continuing on the following day, a shallow depression appeared in the north-west corner of the Bay with cyclonic winds at a few of the neighbouring stations. It was more diffused on the 20th, but the centre of the wind circulation was still between Saugor Island and False Point, and on the 21st it had practically disappeared, leaving the pressure distribution very uniform over the greater part of the province and steep gradients in the north-east corner of the Bay. Wind velocity again increased at the head of the Bay, but, as before, the monsoon was only of about average strength.

Pressure—Changes have rarely exceeded a twentieth of an inch. A slow rise was almost general during the first two days, followed by a slow fall on the 18th and 19th. On the 20th it again increased moderately except in the north and north-east, where the rise exceeded a twentieth of an inch. This slow upward change continued till the last day of the week, when there was a slow fall. These changes had little influence on the general distribution, which on an average has been slightly above the normal at nearly all stations by amounts varying between two and five-hundredths of an inch, the largest excess being in Orissa and South-West Bengal.

Temperature—Owing to the scanty rainfall and comparatively clear skies in the southern districts, has been above the normal in the south-west of the province, while in Assam, East and North Bengal, and Behar, where heavy rain has been fairly continuous, a considerable defect has been recorded. Excess in Orissa and South-West Bengal is about 1° , and in Chutia Nagpur 3° , while defect in Assam is 2° , in North Bengal and Behar rather over 1° , and in East Bengal 4° .

Rainfall.—In the early part of the week practically no rain fell in Orissa and South-West Bengal, and only scattered showers in Chutia Nagpur and East Bengal, but during the last four days more rain was received in these districts, though it became general in East Bengal only. In Behar and North Bengal general heavy rain fell throughout the week, and the mean weekly fall has been largely above the normal. Excess in North Bengal is 3.86, in North Behar 2.43, and South Behar 1.57 inches. The mean fall in East Bengal is very nearly normal, and is below the normal in Chutia Nagpur by .6 inch, in Orissa by 1.32 and South-West Bengal by 1.79 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 22nd of August 1890 :—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.

The mean temperature of the seven days ... 82.6
 The average temperature of the corresponding period for 24 years, S.-G.'s Office ... 83.1
 The extreme variation of temperature ... 15.2
 The maximum temperature ... 89.8

The highest velocity of the wind in one hour ... 9

The highest pressure of wind on one square foot ... Not measurable.

The mean relative humidity ... 87
 The average relative humidity of the corresponding period for 24 years, S.-G.'s Office ... 87

The total fall of rain from 17th to 23rd August 1890 ... 1.41
 The average fall of the corresponding period for 24 years, S.-G.'s Office ... 3.39
 The total fall from 1st January to 23rd August 1890 ... 38.00
 The average fall of the corresponding period for 24 years, S.-G.'s Office ... 45.68

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formulae.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; Δ dew.

J. H. GILLILAND,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
 Calcutta, the 25th August 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 9th August 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 9th August 1890, in twenty-seven principal towns of Bengal, correspond to an annual rate of 17·4 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 3·5 lower than the average rate of the corresponding week of the past five years, and is also lower than the rate of the corresponding week of any of the past five years except 1887, *vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885-89.	1890.
Ratio of births per 1,000 of the population per annum	25·7	21·1	16·4	20·8	20·3	20·9	17·4

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

TOWNS.	WEEKS ENDING—				TOWNS.	WEEKS ENDING—			
	10th July 1890.	26th July 1890.	2nd August 1890.	9th August 1890.		10th July 1890.	26th July 1890.	2nd August 1890.	9th August 1890.
Burdwan	30·5	12·2	15·7	13·7	Narainganj	10·6	29·0	24·8	16·6

Howrah	14·3	15·5	17·8	14·3	Arrah	17·9	19·1	13·2	20·3
Bali	3·5	14·0	10·5	7·0	Mozufferpore	15·8	13·4	14·6	17·0
Krishnagar	15·1	11·4	6·7	11·4	Durbhanga	18·9	27·5	19·7	20·9
Ranaghat	12·0	12·0	6·9	24·0	Chupra	20·1	11·1	6·0	2·0
Santipore	19·3	10·5	14·0	17·5	Bhagulpore	25·3	18·1	18·1	28·6
Jessore	18·4	6·1	18·4	6·1	Monghyr	33·4	41·9	23·5	38·9
Rampore Beaulah	23·6	18·4	31·5	15·8	Purneah	6·9	20·8	10·4	13·9
Darjiling	22·2	22·2	7·4	37·0	Poori	10·5	18·9	6·3	12·6
Dacca	15·6	9·7	11·0	14·9	Total	19·1	18·2	15·3	17·4

It will be seen that last week the highest birth-rate was returned from Monghyr (38·9), and the lowest from Chupra (2).

DEATHS.

THE deaths registered during the week under review correspond to an annual rate of 23·3 per 1,000 of the population. The rate of the week is 8·3 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below:—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885-89.	1890.
Ratio of deaths per 1,000 of the population per annum	48·0	28·7	27·0	25·4	29·1	31·6	23·3

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population:—

TOWNS.	WEEKS ENDING—				TOWNS.	WEEKS ENDING—			
	10th July 1890.	26th July 1890.	2nd August 1890.	9th August 1890.		10th July 1890.	26th July 1890.	2nd August 1890.	9th August 1890.
Burdwan	19·8	27·5	19·8	13·7	Narainganj	16·6	16·6	16·6	12·4
Midnapore	35·6	17·0	7·7	15·5	Chittazong	18·8	18·8	11·7	9·4

Monghyr	...	3·6						
Patna City	...	2·9						

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 3·6 from cholera, against 2·1 per 1,000 in the preceding week; 1 from small-pox, against 0·4; 9·6 from fever, against 7·4; 3·5 from bowel-complaints, against 2·4; 4 from injury, against 8; and 6·1 from other causes, against 6·4 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows:—

<i>According to Sex.</i>			<i>According to Class.</i>			<i>According to Age.</i>		
		Ratio per mille.			Ratio per mille.			Ratio per mille.
Males	...	24·3	Christians	...	7·5	Under 1 year	...	194·6
Females	...	22·1	Hindus	...	25·5	1 and under 5 years	...	30·8
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population	...	110	Mahomedans	...	18·2	5 " 10 "	...	9·9
						10 " 15 "	...	15·1

Comparative Statement of the principal commodities carried over the Bengal Central Railway during the month of June 1890.

INCREASES.						Tons.
Betel-nuts	521
From the Bengal Central Flotilla Company.						
DECREASES.						
Coal	329
Due presumably to sufficiency of stock for railway and flotilla consumption						
Oilseeds	326
Khoolna, Nawapara, and Jhikargacha show the principal decreases, which are said to be due to poor crops in the neighbourhood.						
Sugar	728
Jhikargacha shows the largest falling off. The decrease generally is due to the successful competition of raw sugar from Java.						

F. P. QUINLAN,
Examiner of Accounts.

Calcutta, the 23rd August 1890.

Weekly Return of Traffic Receipts on Indian Railways.

RESOLUTION ON THE TRIENNIAL REPORT ON THE ADMINISTRATION OF THE REGISTRATION DEPARTMENT FOR THE YEARS 1887-88, 1888-89, AND 1889-90.

Calcutta, the 25th August 1890.

READ—

The triennial report on the administration of the Registration Department for the years 1887-88, 1888-89, and 1889-90.

Read also—

The statistical returns for the years 1887-88 and 1888-89, with the remarks thereon.

Read also—

The Report for the year 1886-87 and the Resolution thereon.

The Inspector-General of Registration submits the first triennial report in compliance with the instructions of the Government of India contained in Home Department Resolution No. 28—1579-95, dated the 15th July 1887. The Lieutenant-Governor hopes that in future years it may be possible to obtain correct figures and reports from the district offices by the 1st May, so that the Inspector-General may be able to submit his report for the whole province on an earlier date. On the present occasion there has been no delay in Mr. Holmwood's office. The report is full and interesting and at the same time sufficiently concise, and it is illustrated by a useful and instructive map.

2. The following table, which is taken from the body of the report, is of general interest:—

YEAR.	NUMBER OF REGISTRATIONS.				Total receipts.	Total expenditure.	Surplus.	Number of registration offices.
	Affecting immoveable property.		Other registrations.	Total.				
	Compulsory.	Optional.						
1884-85	374,730	193,811	119,839	688,380	Rs. 10,74,561	5,54,110	5,20,391	290
1885-86	386,032	211,384*	126,485	723,901	10,88,177	5,68,365	5,19,812	292
1886-87	376,898	194,518*	127,123	698,539	10,31,485	5,64,274	4,67,211	300
Total	1,137,660	599,713	373,447	2,110,820	31,94,163	16,86,749	15,07,414	294 average.
1887-88	405,609	95,464*	126,935	717,993	10,21,982	5,79,266	4,42,716	301
1888-89	534,510	113,470	135,482	783,462	10,95,472	5,69,176	4,94,296	304
1889-90	594,938	147,191	151,484	893,608	11,98,801	6,27,454	5,71,347	307
Total	1,625,042	356,125	413,896	2,395,063	33,14,255	18,05,876	15,08,379	304 average.
Increase	487,382	40,449	284,243	1,20,092	1,19,127	965	10
Decrease	243,588

* Including some deeds the registration of which has since become compulsory under the Bengal Tenancy Act.

The most noticeable figures in the above statement are those that show a decrease in optional registrations affecting immoveable property. They are fully explained by Mr. Holmwood, who shows that the decrease is due solely to the gradual introduction of the Transfer of Property Act and to a change in the classification of deeds for the transfer of permanent tenures and holdings of small value by sale or gift. The registration of these was formerly held to be optional, but is now deemed compulsory. In all cases in which sufficient time has elapsed to give these changes their full effect it has been found that optional registrations steadily increase *pari passu* with compulsory ones. There has been a steady increase in the operations of the Department, and its financial position is excellent, the surplus at the close of 1889-90 being larger than that of any previous year. Several new offices have been opened since the close of the year, and the demand for an extension of registration operations still continues.

3. The number of perpetual leases decreased from 78,766 in 1886-87 to 71,642 in 1887-88 and 69,330 in 1888-89, but it again rose to 76,390 in 1889-90. Mr. Holmwood's remarks on this point are of considerable interest and importance. He says:—"There are two great classes of perpetual leases—those given by zemindars to their tenants and those sublet by tenants to others. These two classes fluctuate independently of each other, and the circumstances of each particular district become a factor in determining their variations. But as far as the first class of perpetual leases is concerned, a general rule, such as would be naturally expected, seems to be at work. The amount of land being limited, the settlement by zemindars with their ryots in perpetuity has a tendency to increase up to a certain point, and then to steadily decrease as the majority of the lands become settled. This has actually been observed to be the case in the sub-district of Baraset in the 24-Pergunnahs, where the Sub-Registrar is the most punctual and business-like officer I have under me (which renders his office very popular), and is also a most careful observer and notes facts in connection with registration transactions in the most intelligent manner. He has observed a regular permanent settlement going on during the past two or three years between the zemindars and their ryots, owing to the zemindars finding it difficult to make arbitrary enhancements or ejections under the new law, and the number of registrations under this settlement has already reached its maximum and begun to decline. I have no doubt that this same cause is at work in other sub-districts, where the usual stereotyped explanation is given, that the zemindars find themselves in straitened circumstances owing to a succession of bad harvests; but it is only in particular districts, like those in the Dacca and Chittagong Divisions, where the ryots are prosperous and insist on obtaining some certainty of tenure, that these settlements are at all general." Many of the registrations are, of course, mere paper transactions due to the necessity for re-registration of under-tenures when the ownership of the property is transferred. The disturbance in the ordinary current of land transactions occasioned by the introduction of the Bengal Tenancy Act has rendered it difficult of late years to appreciate the true nature and value of fluctuations in figures of registration of deeds; but the experience of three years of its working

does show that the number of transactions under the head of perpetual leases has steadily increased and tends to reach a certain maximum, after which a decrease may be looked for. The following statement shows the number of perpetual leases registered in some of the important districts since 1882-83, and generally points to the conclusions arrived at by the Inspector-General, although in some districts the individual action of two or three large landholders always affects the statistics, and the bearing of the Tenancy Act upon them is thus prevented from being apparent:—

DISTRICT.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.
Burdwan	904	863	1,012	1,051	1,183	1,118	1,318	1,374
Bankura	1,651	1,699	1,971	2,377	2,554	2,826	2,709	3,270
Midnapore	1,036	1,393	1,478	1,618	2,071	1,594	1,098	1,248
24-Pergunnahs	4,619	4,481	5,051	6,143	6,727	5,839	7,010	7,510
Nuddea	1,713	1,601	1,710	1,509	1,244	1,539	1,686	1,812
Jessore	11,881	11,199	11,315	9,750	6,207	3,792	3,609	4,200
Khulna	2,562	4,575	4,878	4,701	4,376	4,641	5,194	5,210
Dacca	535	796	599	763	899	1,254	1,221	1,317
Furteedpore	6,221	6,076	6,599	6,623	8,038	8,082	7,823	8,819
Backergunge	11,180	10,813	12,069	10,969	10,438	8,988	8,489	8,234
Noakhali	3,331	5,536	7,021	8,117	5,759	5,299	4,555	4,762
Chittagong	15,803	17,248	22,010	23,472	20,437	18,294	16,323	19,627

4. Of the total number of other than perpetual leases, which rose from 187,263 in 1886-87 to 227,686 in 1889-90, 175,231 were counterparts, the percentage of leases being 23·03 as compared with 27·06 in 1886-87, 23·65 in 1887-88, and 23·72 in 1888-89. Any deductions from these figures are dangerous, as District Registrars appear to be doubtful in some cases as to whether kabulyats should be classed as leases, or merely as the counterparts they are, and because pottahs are also frequently entered as counterparts. Moreover, the prevalence of *zar-i-peshgi* and *kurtaoli* leases, of which no counterparts are given, in the most important districts of Behar, frustrates any attempt at theorizing on these statistics. At the same time it is unsatisfactory to note that some of the District Registrars are of opinion that the low figures for their own districts are due to "the inability of the ryots to exact pottahs from their landlords, and the aversion of zemindars to give pottahs on account of their dignity suffering by so doing, on account of the expense, which they consider unnecessary and the ryots are unwilling to incur, and, lastly, on account of a fear of their ryots obtaining occupancy rights."

5. The number of instruments of mortgage of the value of Rs. 100 and upwards rose gradually from 58,648 in 1886-87 to 77,555 in 1889-90. There was a slight decrease last year in the districts of Rungpur, Dacca, and the Sonthal Pergunnahs. Similar instruments of value less than Rs. 100 also considerably increased during the last three years, the figures of the past year being 130,007 against 72,355 in 1886-87. The increase is in many cases ascribed to failure of crops and the high price of food-grains. An interesting cause of the increase during the past year is reported from Noakhali, where the crops have been good and land operations extensive. The District Registrar supposes that many mortgages of small plots of land have been executed by the ryots who have extended cultivation, for the purpose of buying cattle and agricultural implements. In Sarun, where the circumstances are wholly different, a very similar reason for increase is given. The matter is clearly one for further investigation, and the Inspector-General, who has called for a further report from the District Registrar of Noakhali on the subject, will be requested to notice this point in his notes while submitting the statistical returns for the current year. The increase in deeds of mortgage does not appear to have affected the registrations of obligations for payment of money, including bonds and miscellaneous deeds, such as kabinnamahs. The latter rose from 89,795 in 1886-87 to 103,962 in 1889-90. About 82 per cent. of the bonds were of values up to Rs. 100, the rest exceeding that amount. The increase in this case, as in the case of mortgages, is probably due, to a great extent, to the scarcity that affected many parts of Bengal during the past year. The total number of registrations affecting moveable property, excluding wills and written authorities to adopt, increased from 125,188 in 1886-87 to 149,350 in 1889-90.

6. While the aggregate value of property transferred by registered documents increased by more than 520½ lakhs of rupees in 1888-89, it decreased by more than 412½ lakhs during the past year. There was an increase of nearly 11 lakhs in the value of moveable property transferred, but the value

of immoveable property diminished by more than 423 lakhs. It is unsatisfactory to note that no explanation is forthcoming of the wholly unprecedented increase observed last year or of the great fall in the year following. In former years fluctuations in these figures were not considerable, and it is an insufficient explanation to attribute them to general dulness of trade. The Lieutenant-Governor is glad to note that the Inspector-General has called for a special report on this subject, and hopes to hear at an early date what has resulted from a further examination of the details of the statistics now given.

7. Statement XII appended to the report shows that 90,691 transfers of estates and tenures were effected by deeds of sale during the past year against 52,858 in 1886-87 and 81,382 in 1888-89, and that 9.9 per cent. of the purchasers were mahajans, traders or money-lenders, 15.3 per cent. zemindars, 29.6 per cent. intermediate tenure-holders, 24.1 per cent. ryots, and 21.1 per cent. others not specified. The details which show the numbers in each class of purchasers, and the proportion of each to the total, lose much of their value from the fact that certain classes of purchasers, such as mahajans and zemindars, are more likely to register purchases than the lower classes of ryots, and also from the fact that town properties and other estates in the neighbourhood of registration offices must always bear an undue proportion to the total number of transfers registered. The following table compares the sales of ryoti holdings and the number and classes of purchasers during the last four years, and shows a steady increase in the number of such transactions, which is, no doubt, the result of the facilities afforded by the Tenancy Act:—

YEAR.	RYOTI HOLDINGS AT FIXED RATES.							RYOTI HOLDINGS WITH RIGHT OF OCCUPANCY							
	Number of transactions.	PURCHASERS.						Number of transactions.	PURCHASERS.						
		Mahajans, traders, or money-lenders.	Zemindars.		Ryots.	Others.	Total.		Mahajans, traders, or money-lenders.	Zemindars.		Ryots.	Others.	Total.	
			Landlords of holdings transferred.	Other landlords.						Landlords of holdings transferred.	Other landlords.				
1886-87	...	24,721	3,791	786	2,504	13,500	7,315	27,896	53,071	6,438	1,050	3,315	37,662	8,079	56,664
1887-88	...	30,137	4,830	891	2,577	16,368	7,918	32,884	68,200	7,654	974	3,405	40,686	8,143	60,862
1888-89	...	31,296	5,124	1,395	3,092	17,823	8,176	35,610	64,449	8,301	1,371	4,434	45,012	8,030	67,148
1889-90	...	35,342	5,161	1,181	2,615	20,396	8,396	37,649	77,373	10,029	2,060	5,198	54,234	9,277	80,798

8. The number of registrations under sections 12 and 18 of the Bengal Tenancy Act fell from 79,109 in 1886-87, 76,324 in 1887-88, and 47,391 in 1888-89 to 26,780 in 1889-90. The decrease in the past two years is due, to a certain extent, to the discontinuance of the practice of registering deeds relating to fractional portions of permanent tenures or ryoti holdings at fixed rates, where the partition is not made with the landlord's consent in writing. On the subject of sections 12 and 18 of the Act, Mr. Holmwood remarks: "there is not the least doubt that the levy of landlords' fees under those sections is exceedingly unpopular with both landlords and tenants, and that it is evaded in every possible way. The reasons of this unpopularity are not far to seek. The ryots object to pay the landlord's fee because in a great many cases it is refused by the landlord as being beneath his dignity, or as being likely to amount to an admission of an occupancy right of the tenant, and in nearly every case the ryot is not exempted by its payment from the necessity of giving *salami* to his landlord." Sir Stuart Bayley is inclined to agree with the Inspector-General in his deductions from the figures showing a great increase in the number of registrations of leases, mortgages and sales, and to attribute them to the indirect effect of the Bengal Tenancy Act. Mr. Holmwood's interesting comments on these figures and his explanation of them will be brought to the notice of the Revenue Department.

9. Further enquiry will be made into the forgery cases mentioned in paragraph 53 of the report, and the Inspector-General of Registration will be asked for recommendations on the subject of the rules relating to impounded deeds. Mr. Holmwood's remarks as to the power which is given to Rural Sub-Registrars to give gratuitous advice to parties are useful. There can be no doubt

that a free use of this power by sympathetic officers would largely increase the popularity of registration offices among the lower classes.

10. The number of inspections made by the Inspector-General and other officers during the past year was 861 against 863 in 1888-89 and 906 in 1887-88. His Honour is glad to observe that District Registrars have themselves done a fair share of this work, but would impress on them their direct responsibility for the great falling off in the number of inspections by Sadr Sub-Registrars and Sub-divisional Officers. In 16 of the districts that have sub-divisions there were no inspections made at all, and Sir Steuart Bayley is convinced that there can be no adequate excuse for such a failure in duty. The remarks made by the Inspector-General on the subject of *ex-officio* Sub-Registrars at Sadr stations have been noted by the Lieutenant-Governor, and any further representations or special reports on the subject that Mr. Holmwood may think fit to make will receive His Honour's careful consideration.

11. The following table shows the working of Act I (B.C.) of 1876 for the Voluntary Registration of Mahomedan Marriages and Divorces since its introduction:—

YEARS.	Number of districts in which the Act was in force.	Number of offices open on the 31st March.	Number of marriages registered.	Number of divorces other than <i>kholas</i> registered.	Number of <i>kholas</i> registered.	Total number of ceremonies registered.
1876-77 ...	14	77	2,555	402	161	3,118
1877-78 ...	14	103	7,391	1,404	595	9,390
1878-79 ...	14	103	8,161	1,705	771	10,637
1879-80 ...	14	107	7,137	2,097	623	9,857
1880-81 ...	14	106	5,777	1,874	779	8,430
1881-82 ...	14	107	4,951	2,239	667	7,857
1882-83 ...	14	112	5,068	2,247	766	8,081
1883-84 ...	14	112	4,273	2,315	895	7,483
1884-85 ...	14	112	3,913	2,540	957	7,410
1885-86 ...	14	112	3,993	2,422	1,109	7,524
1886-87 ...	14	112	3,926	2,179	1,147	7,252
1887-88 ...	14	112	4,100	2,478	1,090	7,668
1888-89 ...	14	113	4,527	2,819	1,113	8,459
1889-90 ...	14	113	3,959	3,119	1,137	8,215

The districts of Dinagepur, Pubna, Backerganj, Noakhali, Mymensingh, Bogra, Tipperah, and Dacca showed an increase in the total number of ceremonies registered, while the districts of Khulna, Rajshahye, Rungpur, Faridpur, and Chittagong showed a decrease. The Inspector-General of Registration thinks that in the majority of districts the Mahomedan Marriage Registrars are slowly but surely gaining ground, and that in those districts where they do not do so, it is owing to their own inferior qualifications or to the active opposition of interested headmen and zemindars. Mr. Holmwood was lately asked for a separate report with reference to the alleged unpopularity of the Act, and he has given his reasons for holding that it is not in any way unpopular, though in certain places it is neglected and in certain others its effects are destroyed by the opposition of a few hostile zemindars, and the Lieutenant-Governor is inclined to agree with the view he has expressed. Some practical reforms suggested by Nawab Abdul Latif Bahadur, C.I.E., in a valuable minute on the working of the Act, have been adopted by the Permanent Committee and approved by Government, and they will be immediately introduced. The Act is at the same time to be extended, on the recommendation of the Permanent Committee, to the Town of Calcutta and the districts of 24-Pergunnahs, Jessore, and Murshidabad. As regards the Qazis' Act, the Inspector-General writes that the "Act does not seem to gain ground much, though wherever the Qazis are energetic enough to establish Naib Qazis and get hold of the professional persons who arrange marriages there is a marked increase in their operations. This is specially noticed in the districts of Eastern Bengal." The Lieutenant-Governor hopes that district officers will show more interest in the working of this important Act in the future, and notices with

much pleasure the commendation bestowed by the Inspector-General on the admirable work done by Baboo Nil Ratan Mookerjee in Mymensingh.

12. Mr. Blyth was in charge of the Department throughout the past year, with the exception of a few days of the closing month, and was relieved by Mr. Holmwood, the present Inspector-General, on the 16th March 1890. The thanks of the Lieutenant-Governor are due to Mr. Holmwood for his careful and interesting report. The names of the officers specially commended by the Inspector-General will be noted in the Appointment Department.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Inspector-General of Registration for information and guidance.

Ordered also that extract paragraph 8 of the Resolution and extract paragraph 51 of the Report be forwarded to the Revenue Department for information.

Ordered also that a copy of the Resolution, together with a copy of the Report, be submitted to the Government of India, in the Home Department, for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. C. STEVENS,

Offg. Chief Secy. to the Govt. of Bengal.

FLOODS IN THE DISTRICT OF SARUN.

REVENUE DEPARTMENT.

Dated Yacht Rhodas, 26th August 1890.

RESOLUTION.

Read—

Letter No. 28R, dated the 9th August, 1890, from the Commissioner of the Patna Division, asking the sanction of Government to his authorising the Collector of Sarun to make advances under the Agricultural Loans Act and the Land Improvement Advance Act to the extent of Rs. 15,000 in addition to the sum of Rs. 10,000 already assigned to that district on account of heavy inundations.

Read—

Letter No. ²⁸³⁹₁₅₀ Fam., dated the 12th August, 1890, to the Commissioner of Patna, approving of his proposal to authorise the Collector of Sarun to make the advances if the Commissioner is satisfied, on receipt of the Collector's report, that advances to such an extent are necessary.

Read—

Letter from the Commissioner of Patna, No. 505G, dated the 14th August, 1890, submitting a report from the Collector of Sarun on the inundations.

Read—

A letter, dated the 24th August, 1890, from the Commissioner of Patna, submitting a further report from the Collector of Sarun on the inundations and the measures he has taken, and is taking, for the relief of distress.

Mr. Bourdillon has shewn both energy and organising capacity in the arrangements made by him for the relief of the distress caused by the floods. The measures taken within the town of Chupra itself are well conceived, and the Lieutenant-Governor was glad to see, on his visit of inspection, that they had been efficiently carried out. The expense has hitherto been met from municipal funds, from money raised by private subscription, and by the diversion to this purpose of a sum collected for His Honour's reception, a transfer most pleasing to Sir Steuart Bayley. But if a moderate grant should hereafter be required from Government, it will be very willingly given.

In the interior it would appear from the eagerness with which grain sent from Chupra by boat was purchased that there is real distress; which all residents will not be able to provide for by buying grain. The Lieutenant-Governor is, moreover, inclined to doubt whether the mahajans will advance to all ryots, now that the usual security has disappeared with the loss of the crop on the ground, and also whether all labourers will be supported, as the best of them will doubtless be, by their usual employers. It seems desirable to establish a village agency for ascertaining the facts, and administering relief where necessary; also for co-operating with the officers whom the Collector proposes to depute to examine applications for loans. These may be freely given, where required, up to the amount of the Government grant for the purpose, and the proceeds may without objection be applied to the support of the ryots, and their cattle. Very small loans may occasionally be made to labourers, on such security as they can offer. The result of the enquiries made by the village agency will indicate how far gratuitous relief is needed; where required it should not be withheld.

The Lieutenant-Governor desires that the additional arrangements now ordered should be made promptly, and does not contemplate their continuance for any length of time. They are applicable in full only so long as the labourers are deprived of work by the effects of the flood, and may be curtailed when the waters subside. The loans will, no doubt, be necessary at a later period, to ease the pressure caused by the loss of the crop.

ORDER.—Ordered, that a copy of the Resolution be forwarded to the Commissioner of the Patna Division for information and for communication to the Collector of Sarun.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 30th August, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
Western Districts.			
BURDWAN DIVN.	1 Burdwan Aug. 30, '90	0.57	Weather—cloudy and hot. Sugarcane not bad. <i>Aus</i> promising. <i>Amun</i> in good state. Prices of common rice:—
	Culna ...	0.18	
	Cutwa ...	0.58	
	Ranigunge ...	1.36	
	2 Bankoora „ 30, '90	1.15	Weather—cloudy with occasional light showers. More rain wanted for <i>aus</i> as well as for <i>amun</i> crop on high lands. Prospects favourable. Extent of rice sowing this year in the Sudder subdivision estimated at 16 annas. Common rice selling at 19 seers per rupee at Sudder and 18½ seers at Bissenpore.
	3 Birbhum „ 30, '90	4.50	Weather—seasonable. Prospects of all crops—early rice, late rice, and sugarcane—are at present exceptionally good. Prices of rice continue at from 16 to 18 seers per rupee.
	Rampore Haut ...	3.55	
	4 Midnapur „ 30, '90	Nil	Some rain in south of district. Prospects of rice crop fair. More rain wanted throughout district. Demand for canal water increasing. Prices of common rice:—
	5 Hooghly „ 30, '90	1.48	Weather—cool with showers. State and prospects of crops excellent. More rain required for <i>amun</i> rice in the Serampore subdivision. Prices of common rice:—
	Serampore ...	0.52	
Jehanabad ...	1.29		
PRESIDENCY DIVN.	Howrah „ 30, '90	Figures not given.	Weather—showery. More rain wanted in north of district. Transplanting of <i>amun</i> not yet finished. Condition of crops generally on the whole satisfactory. Price of common rice 13 to 14 seers per rupee.
	Central Districts.		
	6 24-Pergha Aug. 30, '90	2.10	Weather—seasonable. Prospects of standing crops good. Transplantation of <i>amun</i> rice still going on. Prices stationary.
	7 Nuddea „ 30, '90	1.50	Weather—seasonable. <i>Aus</i> paddy on high land is being cut and is in good condition. The crops on low lands have been destroyed by the floods.
	Kushtea ...	1.58	
	Meherpore ...	0.40	
	Chuadanga ...	0.59	
	Ranaghat ...	0.28	
	8 Khoolna „ 30, '90	2.08	Weather—sunny and hot in early part of week, rainy in latter part. Excessive rain has done some damage to the crops in the Khoolna thana and to the <i>aus</i> crop in Satkhira, but prospects are still fair.
	Bagirhat ...	0.62	
Satkhira ...	2.16	Weather—hot and cloudy with occasional showers. Much injury has been caused by floods in Bongong, Jhenidah, and Magura to all crops. The <i>aus</i> crop in the greater part of Bongong has been destroyed. More flood water is expected in a few days. Average price of common rice about 13 seers per rupee.	
9 Jessore „ 30, '90	2.68	Weather—seasonable. Considerable destruction of <i>aus</i> and <i>amun</i> in all the lower tracts from flood. Rain wanted for <i>amun</i> . People much inconvenienced by inundation, but distress not much. The Bhagiruthee falling slightly.	
Jhenidah ...	0.44		
Magura ...	2.36		
Narail ...	0.11		
Bongong ...	2.30		
10 Moorsheadabad „ 30, '90	0.84		
RAJSHAHY DIVN.	11 Dinagepur „ 30, '90	6.01	Much rain during the week. Prospects of crops continue favourable. Price of rice unchanged.
	Thakurgaon ...	5.25	
	12 Rajshahye „ 30, '90	0.93	Weather—cloudy and rainy. Flood higher than in last year; it has done some damage to <i>aus</i> paddy which could not be reaped earlier. <i>Haimanti</i> paddy on low lands submerged. Prospect as yet good, if the flood subsides soon.
	Nattore ...	2.90	
	Nowgong ...	1.77	
	13 Rungpur „ 30, '90	2.49	Weather—cool and cloudy with frequent showers. Jute harvest in full swing. <i>Amun</i> rice is being transplanted. Sugarcane flourishes. Prices still range very high.
	Nilphamari ...	1.56	
	Kurigram ...	1.66	
	Gaibanda ...	7.97	
	14 Bogra „ 30, '90	5.09	Weather—very rainy and cloudy. Transplantation of <i>amun</i> nearly completed. Condition of <i>aus</i> and jute good, and <i>amun</i> and sugarcane crops promising. Reaping of <i>aus</i> and jute not yet finished. Common rice selling at 18 seers per rupee.
Sherpur ...	2.91		
Nowkhilla ...	2.15		
15 Pubna „ 30, '90	0.63	Weather—cool and showery. Jute and <i>aus</i> are being cut. Outturn of the latter expected to be 12 annas. Prospects of <i>amun</i> continue good except on low lands. Prices stationary.	
16 Darjeeling „ 30, '90	4.98	Weather—rainy. <i>Bhadoi</i> crop harvested; transplantation of winter rice completed in Terai; prospects of <i>marua</i> good.	
17 Julpigoree „ 30, '90	7.21	Weather—wet and cloudy. Transplanting of <i>haimanti</i> paddy and harvesting of <i>aus</i> paddy going on. Prospects generally good. Jute is being cut. Prices stationary.	

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.—concluded.			
Eastern Districts.			
Dacca Divn.	18 Dacca Aug. 30, '90	2.29	Weather—mostly cloudy and rainy. <i>Aus</i> paddy and jute being harvested. <i>Amun</i> paddy thriving. Rivers are rising again rapidly, and <i>aus</i> and jute have suffered to some extent in consequence. Fodder is available, but not in abundance. Common rice sells at from 13 to 15 seers per rupee.
	19 Furreedpur „ 30, '90	3.99	Weather—seasonable. Water rising. State of <i>amun</i> fair. <i>Aus</i> partially damaged. Common rice selling at 13 seers rupee. Fodder scarce; cattle suffering in consequence.
	20 Backergunge „ 30, '90	1.26	Weather—seasonable. Rainfall heavy in Perozepur (5.16 inches), elsewhere much lighter. Outturn of <i>aus</i> crop estimated at 12 annas. Standing crops promise fair, though partially damaged by flood. <i>Amun</i> seedlings damaged by rise of water in some places, but new sowings have done well. Transplantation going on rapidly; an average crop is expected. Common rice selling at about 13 seers per rupee.
	21 Mymensingh „ 30, '90	3.54	Weather—rainy and cool. About three-fourths of the area set apart for <i>amun</i> paddy has been sown and seedlings transplanted. The plants are healthy and very promising. Jute is being harvested. Coarse rice sells at 13½ seers per rupee.
CHITTAGONG DIVN.	22 Chittagong „ 30, '90	6.04	Weather—seasonable. <i>Aus</i> is being harvested. Transplantation of <i>amun</i> going on. Prospects fair. Common rice selling at 16 seers per rupee.
	23 Noakholly „ 30, '90	4.54	Weather—rainy and cloudy. Reaping of <i>aus</i> crop nearly completed. Transplantation of <i>amun</i> progressing.
	24 Tipperah „ 30, '90	4.09	Weather—seasonable; cool, cloudy and wet. Jute and <i>aus</i> rice are being cut. <i>Amun</i> is being transplanted. Floods considerable in the district, but no serious damage done to standing crops. Prices stationary.
	25 Chittagong Hill Tracts „ 28, '90	4.95	Weather—rainy and sunny throughout the week. Harvesting of early <i>jum</i> paddy continues. Transplanting of late rice crop in low lands nearly finished. Common rice is being sold at 12 seers 15 chittacks per rupee.
BEHAR.	Hill Tipperah „ 29, '90	1.29	Weather—cloudy with occasional showers. Transplanting of <i>amun</i> nearly over. <i>Jum</i> crops promising. Common rice selling at from 13 to 16 seers per rupee.
	26 Patna „ 30, '90	8.27	Weather—very hot. Transplantation of paddy still continues. <i>Marua</i> is being reaped in some places. Prospects of <i>bhadoi</i> crops poor. Sugarcane looks well. Prices of food-grains generally stationary.
	Behar „ „	2.62	
	Dinapore „ „	9.51	
PATNA DIVN.	Barh „ „	6.23	
	27 Gya „ 30, '90	10.30	Weather—rainy and cloudy. Paddy transplantation finished. <i>Marua</i> is being reaped in places. Prospect of <i>bhadoi</i> not good. Prices of food-grains almost stationary.
	28 Shahabad „ 30, '90	2.47	Weather—hot but changeable. Paddy prospects continue good. As already reported, scarcely any <i>bhadoi</i> in Sudder and Buxar. A little <i>bhadoi</i> crop in Sasseram and Bhabuah. Prices stationary.
	Buxar „ „	6.37	
BAGULPORE DIVN.	Bhabuah „ „	5.10	
	Sasseram „ „	4.47	
	29 Durbhanga „ 31, '90	9.13	Weather—generally cloudy. <i>Makai</i> and <i>marua</i> commenced to be harvested in places. Retransplanting of rice still going on on some of the lands previously inundated. Prospects generally favourable. Price of common rice varies from 14 to 16 seers per rupee.
	Somastipur „ „	4.31	
BAGULPORE DIVN.	Madhubani „ „	6.41	
	30 Mozufferpur „ 30, '90	6.99	Another rainy week, but it has now cleared up and there is some prospect of dry weather. Condition of rice crop satisfactory, except in low places where damage has been done by floods. <i>Makai</i> ripening; a crop of from 6 to 8 annas will probably be gathered. Prices stationary and much lower than last year.
	Hajipur „ „	3.14	
	31 Sarun „ 30, '90	2.70	Monsoon weather. <i>Bhadoi</i> crop is almost a total failure. Rice a complete failure over one-fourth of the district from flood; about a 12-anna crop elsewhere. Indigo prospects poor.
BAGULPORE DIVN.	32 Champarnn „ 30, '90	8.80	Weather—fair and cloudy alternately. Heavy rain again during the week. Harvesting of <i>saro</i> rice and <i>kodo</i> commenced. <i>Aghani</i> rice doing well. <i>Makai</i> in ear.
	Bettiah „ „	6.65	
	33 Monghyr „ 30, '90	2.90	Weather—cloudy and rainy with sunshine at times. Prospects of winter rice continue favourable. <i>Sama</i> , <i>kaoni</i> , and <i>makai</i> are being reaped in the Beguserai subdivision.
	Beguserai „ „	2.47	
BAGULPORE DIVN.	Jamui „ „	4.34	
	34 Bhagulpore „ 30, '90	6.01	Weather—rainy with intervals of sunshine. Except for portion of the crop in the Soopool subdivision destroyed by floods, the prospects of the <i>aghani dhan</i> are good. <i>Marua</i> , <i>janera</i> , and <i>bhadoi dhan</i> harvests are in progress.
	Banka „ „	2.71	
	Mudhepura „ „	3.25	
BAGULPORE DIVN.	Soopool „ „	3.58	
	35 Purneah „ 30, '90	6.83	Copious rain throughout the week and cloudy weather. <i>Aghani</i> trans-plantation is still going on in the Purneah and Kishengunge subdivisions. It is doing well in the Arrareah subdivision. <i>Bhadoi</i> paddy and jute are still being cut; outturn good.
	Kishengunge „ „	9.70	
	Arrareah „ „	7.29	
BAGULPORE DIVN.	36 Maldah „ 30, '90	6.48	Weather—generally bright. Heavy rain on 29th. Much damage has been done to <i>bhadoi</i> by inundation. <i>Bhadoi</i> outturn expected to average about 6 annas. Prospects of jute and winter rice good, though in some places they have been slightly damaged. Common rice selling at from 12 to 17 seers per rupee.
	Chanchal „ „	3.08	
	Shibgunge „ „	2.31	
	Gajole „ „	11.64	
BAGULPORE DIVN.	37 Sonthal Pergba „ 30, '90	0.75	Weather—seasonable. Present break in the rains is doing much good. Rice crop is everywhere doing very well, and prospects are excellent. <i>Makai</i> has been more damaged by the rain than was anticipated, and from Deoghur it is reported to be nearly a total failure.
	Deoghur „ „	3.39	
	Godda „ „	2.11	
	Jamtara „ „	0.87	
BAGULPORE DIVN.	Pakour „ „	2.03	
	Rajmehar „ „	3.17	

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.			
38	Cuttack	...	Report not received.
39	Pooree	Aug. 28, '90	Weather—seasonable. Transplanting and weeding of <i>sarad</i> going on. <i>Beals</i> is being harvested. Miscellaneous crops doing well. Price of common rice ranges from 21 seers to 18 seers 6 chittacks per rupee.
	Knoorda	...	
	Banpur	...	
40	Balasore	„ 30, '90	Weather—cloudy but rainless. The insufficient rainfall of July and August has spoilt the excellent prospects of June, especially in the Bhadrak sub-division. Number on relief-works 36. Relief-works close tomorrow (31st August).
CHOTA NAGPORE.			
South-West Frontier Agency.			
41	Hazaribagh	Aug. 30, '90	Weather—seasonable. Rain and sunshine alternating. Transplanting of paddy completed in most places, and the crop is doing very well. Prospects of Indian-corn poor. Other <i>bhadoi</i> crops also damaged by excessive rain. Prices stationary.
42	Lohardugga	„ 30, '90	Weather—warm and cloudy. Transplantation of winter rice finished. Prospect of <i>bhadoi</i> is good. Some damage has been caused to <i>maka</i> in Palamow by excessive rain.
	Palamow (up to 25th Aug.)	2:16	
43	Singbhoom	Aug. 30, '90	Rain still holding off in Chybassa and its neighbourhood; in other parts sufficient rain said to have fallen. Excepting in Chybassa thana, where the <i>bera</i> paddy crop is said to have suffered from 2 to 4 annas in extent, all crops are reported to be doing well. Indian-corn and <i>gora</i> paddy are yielding fully.
44	Manbhoom	„ 30, '90	Weather—seasonable. Prospects of winter crops good. <i>Bhadoi</i> crop not favourable; outturn much below the average. No report about indigo outturn yet received. Common rice selling at from 17 to 22 seers per rupee.

 The average temperature of the corresponding period for 24 years, S.-G.'s Office ... 83.2
 The extreme variation of temperature ... 12.8
 The maximum temperature ... 88.5

The highest velocity of the wind in one hour ... 15
 The highest pressure of wind on one square foot ... Not measurable.

The mean relative humidity ... 87
 The average relative humidity of the corresponding period for 24 years, S.-G.'s Office ... 86

The total fall of rain from 24th to 30th August 1890 ... 2.17
 The average fall of the corresponding period for 24 years, S.-G.'s Office ... 2.34
 The total fall from 1st January to 30th August 1890 ... 40.17
 The average fall of the corresponding period for 24 years, S.-G.'s Office ... 48.02

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph. The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; d, dew.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last year. The humidity of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by c and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past year. The stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 29th of August 1890.

DISTRICT OBSERVATIONS.															Representative station.	DISTRICT.	METEOROLOGICAL DIVISION.
Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	OF WEEK.		RAINFALL.

Explanation.—..... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, the 2nd September 1890.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE
29TH OF AUGUST 1890.**

WEATHER conditions have been very similar to those of the previous week: pressure slightly above the normal and subject to small oscillations, temperature uniformly below in the northern and normal on an average in the southern districts, while the rainfall distribution is identical, scattered in Orissa, South-West Bengal, and parts of Chutia Nagpur and East Bengal, and considerably above the normal in North Bengal and Behar. These conditions have been very constant from day to day, and with the exception of a brisk rise of pressure in the middle of the week in the northern districts while the barometer remained steady in the north-west of the Bay, pressure changes have had little or no influence in altering the general distribution. Lowest pressure has generally been over the north-west of the province, and gradients running east and west, accompanied by the normal circulation of winds, south-west in Orissa and Chutia Nagpur, south-east in East Bengal, and easterly elsewhere. At times westerly winds blew in South Behar, but directions in that district have been irregular and velocity at times very low. On the 26th, when pressure rose between a twentieth and a tenth of an inch in all districts except Orissa, where the rise was only about a hundredth of an inch, a depression formed in the north-west corner of the Bay and adjacent land, but it disappeared by the following day, leaving very uniform pressure over the greater part of the province, gradients being somewhat steeper than usual in the east. After the 26th pressure fell slowly, and the distribution at the end of the week was exactly similar to that at the beginning, but wind circulation was much lighter in North Bengal and Behar, and rainfall not so heavy or general.

Pressure—On the 23rd, the first day of the week, was rising slowly in Orissa and South-West Bengal, and falling slowly in the other districts; on the 24th it remained steady and again fell slowly on the 25th, when the distribution was practically normal, but slightly above, the largest excess being less than a twentieth of an inch in Orissa. On the 26th the most important change of the week occurred, after which excess varied from a twentieth of an inch in Orissa to a tenth in North Bengal. During the latter half of the week there was a steady slow fall in all districts except in Behar and Chutia Nagpur, where a brisk rise occurred on the 29th. The distribution at the close of the week was again nearly normal, there being a slight defect in North Bengal, and a small excess elsewhere, largest in the western districts, but nowhere over a twentieth of an inch. Average pressure for the week is about a twentieth of an inch above the normal in Orissa, and elsewhere about three-hundredths.

Temperature—At the beginning of the week was falling in all districts, and the daily means were below the normal by variable amounts ranging up to nearly 5° in Orissa and South Behar. The defect occurred to a greater extent during the day than at night, and the difference from the average maximum temperature for the season was over 6° at False Point and Arrah, while defect in night temperature was only 2.5° and 2.3° respectively. From the 24th to the 28th temperature rose steadily, and by the latter date defect had almost disappeared. On the 29th a general fall again took place, giving defect at nearly all stations; but on this occasion while a large defect occurred in the day temperatures in North Bengal and North Behar, these were nearly normal in South Behar, and minimum temperature was from 3° to 5° below the normal. The means for the week are all below the normal except that for South-West Bengal, where however excess is only a tenth of a degree. Defect in Assam is 2.4° , North Behar 1.4° , South Behar 1.3° , Chutia Nagpur $.9^{\circ}$, Orissa $.8^{\circ}$, East Bengal $.7^{\circ}$, and North Bengal $.2^{\circ}$.

Rainfall—As stated above, has been scattered in South-West and East Bengal and Chutia Nagpur, but heavy and general elsewhere, especially during the first two and last two days of the week. Falls in Orissa have been variable: under 1 inch in Balasore, over 2 in Pooree, and over 3 inches at Cuttack and Kendrapara. In parts of Midnapore, Jessore, and Moorshedabad falls are over 2 inches, but elsewhere in South-West Bengal they are generally between 1 and 2 inches. In East Bengal heavy rain fell on the 23rd in Chittagong, Backergunge, and Noakholly, and on the 29th in Furreedpore, Dacca, Tipperah, and Mymensingh, but the total falls for the week are very variable, ranging from half an inch to 6 inches. In Julpigoree, Cooch Behar, and Darjeeling hills general heavy rain has fallen, the heaviest falls being Alipur Dooar 20.3 inches, Mickilgunge and Buxa over 18 inches. In the other districts of North Bengal falls vary from 1 inch to 10 inches. In Behar the distribution is more uniform, at about 4 inches, but sometimes as high as 10 inches. The means for the larger divisions are above the normal in East and North Bengal and Behar and below elsewhere. Excess in North Behar is 3.26, in South Behar 2.12, North Bengal 2.05 inches, and the largest defect is 1.11 inches in South-West Bengal.

1802 SUPPLEMENT TO THE CALCUTTA GAZETTE, SEPTEMBER 3, 1890.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 29th of August 1890 :—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1890.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

The extreme variation of temperature 15.0

The maximum temperature 91.0

The mean 10 A.M. relative humidity of the seven days % 81

The total fall of rain from 24th to 30th August 1890 Inches. 1.96

The daily mean temperatures are the crude means of maximum and minimum temperatures.

J. H. GILLILAND,
For Meteorological Reporter to the Govt. of India.
METEOROLOGICAL OFFICE, INDIA ;
The 1st September 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 16th August 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 16th August 1890, in twenty-seven principal towns of Bengal, correspond to an annual rate of 18·7 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 3·7 lower than the average rate of the corresponding week of the past five years, and is also lower than the rate of the corresponding week of any of the past five years, except 1887—*vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885-89.	1890.
Ratio of births per 1,000 of the population per annum	29·7	22·7	17·9	20·1	21·8	25·4	18·7

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

TOWNS.	WEEKS ENDING—				TOWNS.	WEEKS ENDING—			
	26th July 1890.	2nd August 1890.	9th August 1890.	16th August 1890.		26th July 1890.	2nd August 1890.	9th August 1890.	16th August 1890.
Burdwan	12·2	13·7	13·7	15·3	Narainganj	29·0	24·8	16·6	33·1
Midnapore	7·7	15·3	13·9	12·4	Chittagong	14·1	4·7	4·7	16·4

Utterpara	18·9	18·9	18·9	9·4	Gya	33·5	17·8	21·9	28·7
Howrah	15·5	17·8	14·3	18·3	Arrah	19·1	13·2	20·3	26·3
Bali	14·0	10·5	7·0	7·0	Mozufferpore	13·4	14·6	17·0	18·2
Krishnagar	11·4	6·7	11·4	13·3	Durbhanga	27·5	19·7	23·9	18·1
Ranaghat	12·0	6·0	24·0	6·0	Chupra	11·1	6·0	3·0	12·1
Santipore	10·5	14·0	17·5	14·0	Bhagulpore	18·1	18·1	23·6	25·3
Jessore	6·1	18·4	6·1	Monghyr	41·6	23·5	38·9	40·7
Rampore Beaulah	18·4	31·5	15·8	36·8	Purneah	20·8	10·4	13·9	6·9
Darjiling	22·2	7·4	37·0	22·2	Poori	18·9	6·3	12·6	6·3
Dacca	9·7	11·0	14·9	17·5	Total	18·2	18·3	17·4	18·7

It will be seen that last week the highest birth-rate was returned from Monghyr (40·7), and the lowest from Ranaghat (6·). No births were registered during the week in Jessore town.

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 22·8 per 1,000 of the population. The rate of the week is 8·7 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years with which comparison is instituted—*vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885-89.	1890.
Ratio of deaths per 1,000 of the population per annum	31·0	28·4	27·7	26·1	24·5	31·5	22·8

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population :—

TOWNS.	WEEKS ENDING—				TOWNS.	WEEKS ENDING—			
	26th July 1890.	2nd August 1890.	9th August 1890.	16th August 1890.		26th July 1890.	2nd August 1890.	9th August 1890.	16th August 1890.
Burdwan	27·5	19·8	13·7	10·7	Narainganj	16·6	16·6	12·4	16·6
Midnapore	17·0	7·7	15·5	17·0	Chittagong	18·8	11·7	9·4	21·1
Hughli and Chinsurah	34·6	26·3	18·1	31·2	Comillah	38·5	26·9	7·7	23·1
Serampore	39·3	51·0	51·0	33·4	Patna City	18·8	13·0	20·1	15·3
Utterpara	47·2	37·7	9·4	37·7	Gya	37·6	44·4	56·7	56·7
Howrah	13·7	10·9	20·0	19·5	Arrah	30·5	8·4	20·3	13·2
Bali	21·1	14·0	10·5	24·0	Mozufferpore	23·8	18·8	23·1	20·7
Krishnagar	11·4	6·7	11·4	11·4	Durbhanga	25·2	16·5	34·6	27·5
Ranaghat	12·0	24·0	24·0	12·0	Chupra	18·1	11·1	5·0	15·1
Santipore	15·8	17·5	19·3	14·0	Bhagulpore	22·6	14·5	12·7	23·4
Jessore	12·2	12·2	12·2	18·4	Monghyr	25·3	15·4	23·9	21·7
Rampore Beaulah	23·6	15·8	31·0	34·2	Purneah	10·4	15·9	24·2	13·9
Darjiling	22·2	88·9	66·7	66·7	Poori	35·7	33·6	23·1	25·2
Dacca	15·6	27·2	22·3	20·1	Total	23·1	19·2	23·3	22·8

It will be seen that last week the highest mortality occurred in the town of Darjiling (66·7) and the lowest in Burdwan (10·7).

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follows:—

<i>Cholera.</i>		<i>Fever.</i>		<i>Bowel-complaints.</i>		<i>Other causes.</i>	
	Ratio per mille.		Ratio per mille.		Ratio per mille.		Ratio per mille.
Gya	... 15·0	Darjiling	... 37·0	Midnapore	... 12·4	Gya	... 13·7
Durbhanga	... 13·4	Rampore	23·6	Hughli and Chin-surah	... 11·5	Bhagulpore	... 10·9
Santipore	... 7·0	Gya	... 21·2				
Mozufferpore	... 6·1						
Chupra	... 5·0						
Patna City	... 2·9						

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 3·5 from cholera, against 3·6 per 1,000 in the preceding week; 9·4 from fever, against 9·6; 3·9 from bowel-complaints, against 3·5; 5·4 from other causes, against 6·1 in the preceding week. Small-pox and injury exhibit the same ratios as in the preceding week, viz. 1 and 4 respectively.

The mortality of last week according to *Sex*, *Class*, and *Age* was as follows:—

<i>According to Sex.</i>		<i>According to Class.</i>		<i>According to Age.</i>	
	Ratio per mille.		Ratio per mille.		Ratio per mille.
Males	... 25·4	Christians	... 7·5	Under 1 year	... 163·9
Females	... 20·0	Hindus	... 24·0	1 and under 5 years	... 43·6
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population	127	Mahomedans	... 20·1	5 " 10 "	... 17·9

RULES UNDER ACTS I (B.C.) OF 1889 AND I OF 1882.

GENERAL DEPARTMENT.

Calcutta, the 9th September, 1890.

RESOLUTION.

READ—

The Resolution dated the 17th April, 1890, publishing for public criticism draft rules as to emigration to the tea districts of Assam under Act I (B.C.) of 1889 and Act I of 1882.

Read also the following letters commenting on the draft rules:—

Letter from the Superintendent of Emigration, No. 1083, dated the 17th May, 1890.

Letter from the Superintendent of Emigration, No. 1119, dated the 27th May, 1890, covering a communication from the Indian Tea Association.

Letter from the Consulting Engineer to the Government of India for Guaranteed Railways, No. 945, dated the 22nd May, 1890.

Letter from the Superintendent and Remembrancer of Legal Affairs, No. 466, dated the 14th July, 1890.

Letter from the Superintendent of Emigration, No. 1573, dated the 19th August 1890.

Draft rules for the further guidance of those conducting emigration to Assam either under Act I of 1882 or Bengal Act I of 1889 were published for public criticism in the *Calcutta Gazette* of the 14th May last. The suggestions received in reply having been considered, and adopted in nearly every

instance, the following rules are now approved by the Lieutenant-Governor with effect from the 1st October next:—

Rules issued in addition to the existing rules under Act I (B.C.) of 1889.

18. The daily despatch of emigrants by train shall be previously arranged for by the forwarding agent with the Railway authorities concerned, so as to prevent overcrowding by the securing of sufficient carriage accommodation for the whole number of emigrants intending to travel.

19. The agent shall provide for emigrants started on a railway journey after 9 A.M. a cooked meal, and for those started at or before that hour, if a cooked meal cannot be provided, a dry meal instead, consisting of bread or biscuit and sugar in the proportion of one pound of bread or two large biscuits and one ounce of sugar to each emigrant of and above ten years of age, and half the above quantities to each emigrant under the age of ten years. Also, if the journey between two halting stations is likely to occupy more than six hours, bread or biscuit and sugar in the same proportions shall be given by the agent for distribution to the emigrants for consumption during the journey.

20. When a medical officer has been appointed by Government to examine emigrants, no emigrants shall be put into the train without being inspected and passed as fit to undertake the journey by such officer. The medical officer will report any breach of Rule 19 which may come to his notice.

21. When despatching emigrants by train, the purest drinking water obtainable shall be supplied by the agent in a sufficient number of suitable vessels conveniently placed with the emigrants in the carriages. Emigrants shall be afforded during the journey opportunities for leaving their carriages at three selected watering-stations between Sara and Parbutipur, one-third of the carriages at a time being emptied to admit of the station latrines being used and of additional supplies of drinking-water being obtained.

22. Emigrants about to travel by train shall be accommodated in third class carriages specially reserved for them, or in suitably constructed goods waggons, and the number in each carriage or goods waggon shall in no case exceed the regulation number. When a goods train is used for carrying emigrants, the speed shall not be less than 15 miles an hour on the broad gauge and 12 miles an hour on the metre gauge, exclusive of halts for the convenience of emigrants, but not of other halts.

23. The train journey of emigrants under conveyance from recruiting districts direct to Dhubri or to Goalundo shall be performed by the Hooghly-Naihati route.

24. If cholera occurs on the journey by train, the patient shall as soon as possible be removed by the Railway authorities to the nearest cholera hospital on the line or other suitable place for medical treatment; and particulars of the case, furnishing name of emigrant, batch to which belonging, and depot from which originally despatched, shall be forwarded by the station-master to the officers concerned. The expense incurred in removal to a suitable place for medical treatment shall be debited to the Inland Labour Transport Fund, and subsequently recovered from the forwarding agent or employer interested in the patient.

5A. It shall be the duty of the Superintendent of Inland Emigration to inspect places of accommodation provided for emigrants in Calcutta.

25. The provision of Rule 16 of the rules previously issued shall extend to the present rules.

Rules to be substituted for the existing Rules 64, 65, and 69 under the Inland Emigration Act, I of 1882.

64. The daily despatch of emigrants shall be previously arranged for by the contractor or forwarding agent with the Railway authorities concerned, so as to prevent overcrowding by the securing of sufficient carriage accommodation for the whole number of emigrants intending to travel.

65. The contractor or garden sardar shall provide for emigrants started on a railway journey after 9 A.M. a cooked meal; and for those started at or before that hour, if a cooked meal cannot be provided, a dry meal instead, consisting of bread or biscuit and sugar in the proportion of one pound of bread or two large biscuits and one ounce of sugar to each emigrant of and above ten years of age, and half the above quantities to each emigrant under the age of ten years. Also, if the journey between two halting stations is likely to occupy more than six hours, bread or biscuit and sugar in the same proportions shall be given by the contractor or garden sardar for distribution to the emigrants for consumption during the journey.

69. When a medical officer has been appointed by Government to examine emigrants, no emigrants shall be put into the train without being inspected and passed as fit to undertake the journey by such officer.

69A. When despatching emigrants by train, the purest drinking-water obtainable shall be supplied by contractors or forwarding agents in a sufficient number of suitable vessels conveniently placed with the emigrants in the carriages. In the absence of latrine arrangements, emigrants shall be afforded opportunities for leaving their carriages at three selected watering-stations between Sara and Parbutipur, one-third of the carriages at a time being emptied to admit of the station latrines being used and of additional supplies of drinking water being obtained.

Rules issued in addition to the existing rules under Act I of 1882.

69B. Emigrants about to travel by train shall be accommodated in third class carriages especially reserved for them, or in suitably constructed goods waggons attached to passenger trains only, and the number in each carriage or goods waggon shall in no case exceed the regulation number. When a goods train is used for carrying emigrants, the speed shall not be less than 15 miles an hour on the broad gauge and 12 miles an hour on the metre gauge, exclusive of halts for the convenience of emigrants, but not of other halts.

69C. The train journey of emigrants under conveyance from recruiting districts direct to Dhubri or to Goalundo shall be performed by the Hooghly-Naihati route.

170A. Whoever commits a breach of any of the following rules under the Act shall be punishable with fine which may extend to Rs. 500:—Rules 19, 37, 49 to 52, 62 to 69, 71, 72, 79, 113, 118 to 120, 165, and 166.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

The following report is published for general information.

H. J. S. COTTON,

Secretary to the Government of Bengal.

REPORT ON THE WORKING OF THE FIRE BRIGADE IN THE
TOWN AND SUBURBS OF CALCUTTA AND IN
HOWRAH DURING THE YEAR 1889-90.

No. 4895, dated Calcutta, the 14th August 1890.

From—J. LAMBERT, Esq., C.I.E., Commissioner of Police, Calcutta,

To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit, under section 30 of Act IV (B.C.) of 1883, the following report on the working of the Fire Brigade in the Town and Suburbs of Calcutta and in Howrah, for the year 1889-90.

2. The Brigade was in attendance at 36 fires during the year, 11 in the Town, 18 in the Suburbs and 7 in Howrah, as compared with 38 fires in the preceding year. The value of the property destroyed was Rs. 4,59,800, against Rs. 13,06,255.

3. Of the several fires which occurred during the year under review, the following call for special notice:—

In the town two destructive fires occurred in the Jorabagan section, in one of which property to the value of Rs. 93,000 was burnt, and in the other several tiled huts and a large godown, containing oil, tobacco and tar, valued in all at Rs. 15,000, were destroyed, and a man who was sleeping in one of the huts was burnt to death. In the port of Calcutta four boats laden with straw and one laden with jute, valued at Rs. 10,340, were destroyed.

In the Suburbs, on the 16th May 1889, a large quantity of hay and straw and 14 tiled huts at Narcoldanga, valued at Rs. 40,000, were burnt, and on the 10th March 1890 the press-house of the Bengal Hydraulic Jute Company in Chitpore, containing 9,000 bales of jute, was destroyed. The value of the property so destroyed was estimated at Rs. 2,70,000.

In Howrah the fires were confined to thatched and tiled huts.

4. A memorandum of the fires, and also a statement of the receipts and expenditure of the Brigade, are enclosed.

5. During the year under reference, 28 persons were prosecuted in the town of Calcutta under the Indian Explosives' Act IV of 1884, for the manufacture, possession and sale of fireworks, and of these 26 were convicted and 2 acquitted.

6. No license for the sale of fireworks was withdrawn during the year.

1814 SUPPLEMENT TO THE CALCUTTA GAZETTE, SEPTEMBER 10, 1890.

Memorandum of Fires in the Town and Suburbs of Calcutta and in Howrah from 1st April 1889 to 31st March 1890.

Number.	Date.	Locality with section letter.	Duration of fire.	Approximate value of property destroyed.	Remarks, showing nature of damage done, &c.

J. LAMBERT,
Commissioner of Police.

CREATION OF A FREE STUDENTSHIP IN THE SANSKRIT COLLEGE.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 6th-September, 1890.

RESOLUTION.

READ—

A letter from the Director of Public Instruction, No. 4808, dated the 29th August, 1890, regarding the offer of Sreemati Sati Devi of Chandannagar to create a free studentship in the Sanskrit College.

The Director of Public Instruction reports that Sreemati Sati Devi of Chandannagar has offered through the Principal of the Sanskrit College to make over 4 per cent. Government securities of the nominal value of Rs. 600 for the creation of a free studentship in the First Arts class of that College for the benefit of a son of a Bhattacharyya Brahmin, on condition that the fee payable by such free student be fixed at Rs. 2 a month, and that the free student be called "Sati Devi's scholar." The Lieutenant-Governor is pleased to accept this offer, and tenders the thanks of Government to the donor for her liberality. The Principal of the Sanskrit College will be the administrator of the fund.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Director of Public Instruction for information and communication to the donor.

Ordered also, that a copy of this Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,
Secretary to the Government of Bengal.

**RESOLUTION ON THE ANNUAL REPORT OF THE MARINE
DEPARTMENT FOR 1889-90.**

No. 2370 Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

RESOLUTION.

Dated Calcutta, the 4th September 1890.

READ—

The Annual Report of the Port Officer of Calcutta for the year 1889-90.

Lieutenant E. W. Petley, R.N., was in charge of the Port Office throughout the year, and the report is submitted by him.

2. The building for the Port and Shipping Offices was not completed during the past year, as was expected at the time when the Annual Report of the Marine Department for 1888-89 was reviewed. It is now nearly finished.

3. The strength of the Pilot Service at the end of the year was 60 pilots of all grades and 17 leadsmen apprentices. The number of pilots now accords with the scale which was sanctioned in the orders dated the 4th July 1888. No leadsmen apprentices were appointed during the year.

4. The leadsmen apprentices still occupy the two houses at Garden Reach rented by Government for their accommodation, and the premises are reported to be admirably suited for the purpose. These quarters were, as in the year before, under the management of a Mess Committee, and the Port Officer, who inspected them frequently during the year, found them to be in excellent order.

5. The following statement shows the number of arrivals and departures during the past two years:—

		1888-89.			1889-90.		
		Number.	Gross tonnage.	Net tonnage.	Number.	Gross tonnage.	Net tonnage.
Arrivals	...	1,037	2,245,857	1,615,935	1,038	2,250,948	1,604,153
Departures	...	1,034	2,240,444	1,608,656	1,018	2,202,819	1,570,776
Total	...	2,071	4,486,301	3,224,591	2,056	4,453,767	3,174,929

6. These figures are exclusive of 13 light-vessels, 13 pilot brigs, and 34 other Government vessels; 2 vessels put back, 7 steam-tugs, which are constantly moving up and down the river, and the steamers trading to the Orissa ports. Of these there were 133 arrivals and 134 departures. They do not also include the native craft.

7. The size and draft of steamers visiting the port still continue to increase. One hundred and forty-three steamers, drawing over 21 feet, entered the port during the year under review, against 120 in the year before.

8. The average number of vessels piloted by the several grades of the Pilot Service, with the exception of the Junior Masters, was in excess of that of the preceding year. The number, however, that fell to the share of Junior Masters came down from 3.26 a month in 1888-89 to 3.13 during the year under review. It is very difficult to reconcile all the interests involved in the division of tonnage amongst the several grades of pilots, but on the whole the arrangement which was sanctioned in the orders of the 4th July 1888 has worked well so far.

9. Thirty-nine cases of grounding and five of collision took place during the year, against 50 and 12 in the year before. None of these casualties, however, resulted in the loss of a vessel, and in one only was serious damage done. The collisions were all accidental, but as regards the groundings blame was attached to the pilots in ten cases. Eight of these were due to error of judgment, one to inattention, and one to unskilfulness. The remaining cases of grounding were either accidental or unimportant, or due to alteration of channel.

The percentage of casualties amounted to 2·14, against 2·99 in the year before and 2·84 in 1887-88. The reduction of the percentage is satisfactory.

10. The Eastern Channel and the lower part of the Gasper have remained unaltered, but the channel between the Longsand and the Upper Gasper light-vessels deteriorated considerably. The channel between the Longsand light-vessel and the Longsand spit buoy has also shoaled somewhat, and there is no anchorage for deep vessels anywhere between the Lower Eastern Gasper and the Longsand spit buoys. The Eden Channel has improved, and has 17 feet of water in the best track over the bar. It is stated that seven inward-bound vessels and two outward-bound were delayed for want of sufficient water over the bars. This does not, however, take account of vessels being kept in the port for want of water over the bars during certain stages of the tides. Were these cases included, the number of outward-bound vessels delayed would be higher.

11. The new steamer *Guide*, which was built in England to take the place of the *Undaunted*, arrived towards the close of the year, and was, after being surveyed, taken over from the builders and fitted out for duty. The vessel is well fitted in every way for the service on which she is employed. She has, since the close of the year, been taken over by the Government of India in the Marine Department. The new pilot brig *Fame* arrived at the beginning of the year. Considerable expenditure had to be incurred on alterations and in rectifying defects to make her fit for the work of a pilot brig. The *Sarsuti* was thoroughly overhauled, cleaned and painted during the year, and is reported to be in good condition. The hull, rig and equipment of the *Coleroon* were thoroughly repaired to render her efficient with the usual ordinary repairs for some years to come. The new launch for the Port Officer has been completed since the close of the year.

12. One hundred and twenty-four candidates were examined for colonial and local certificates of competency of various grades, of whom 88 passed. Of the successful candidates, 19 obtained colonial certificates of competency as master, 24 as first mate, 3 as only mate, 17 as second mate, 3 as first class engineer, and 6 as second class engineer. The local certificates consisted of 1 master's, 1 first mate's, 2 second mate's, 4 second class engineer's, and 44 engine-driver's. One candidate obtained a license as a steam-tug pilot, and three certificates as master were granted under Act VI of 1884. The licenses of two of the native pilots were renewed, 14 new permits were granted to native coasters and 6 were renewed. Five vessels were registered under the English Merchant Shipping Act of 1884, and the registry of three was cancelled.

13. The Government of India having asked for a separate report on the working of the Native Passenger Ships Act, 1887, the number of certificates issued during the year is not given in the report under review.

14. Lieutenant Petley's management of the department during the year was entirely satisfactory.

By order of the Lieutenant-Governor of Bengal,

J. M. McNEILE, *Col., R.E.*,
Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 6th September, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.	
BENGAL.				
Western Districts.				
BURDWAN DIV.	1 Burdwan Sept. 6, '90	4.74	Weather—hot and clear. Prospects of crops good. Rain wanted in certain parts of the district. Prices of common rice:—

	Contai ...	16 0		
	Tumlook ...	14 3		
	Ghatal ...	16 0		
		} per rupee.		
5 Hooghly „ 6, '90	2.08	Temperature has increased considerably. Weather generally fair with occasional heavy showers. State and prospects of crops satisfactory. Prices of common rice:—		
	Serampore ...	4.33		
	Jehanabad ...	0.04		
	Howrah „ 6, '90	0.45	Weather—fair except for a few showers. More rain wanted for <i>amun</i> crop. Harvesting of <i>aus</i> crop begun. Prospects of crops still continue satisfactory. Price of common rice 13 to 14 seers per rupee.	
	Uluberiah ...	1.21		
Central Districts.				
PRESIDENCY DIV.	6 24-Perghs. Sept. 9, '90	1.21	Weather—hot and clear. Prospects of all standing crops continue good except those in the northern parts of the Bussirhat subdivision, which are said to have been affected by the floods. Transplantation of <i>amun</i> nearly finished. Harvesting of <i>aus</i> and jute going on. Prices stationary.	
	7 Nuddea „ 6, '90	2.64	Weather—sunny and hot. Harvesting of <i>aus</i> still going on. Flood has slightly gone down. Price of common rice 13 seers per rupee.	
		Kushtea ...	4.28	
		Meherpore ...	1.52	
		Chudanga ...	0.73	
	8 Khoolna „ 6, '90	0.17	Weather—very hot at head-quarters, rainy in Satkhira. Floods in the northern part of the district, and crops on low lands submerged and destroyed. <i>Aus</i> is being harvested; outturn will be about 10 annas. Transplantation of <i>amun</i> going on. Prices of food-grains rising.	
		Bagirhat ...	1.08	
		Satkhira ...	4.79	
	9 Jessore „ 6, '90	0.16	Weather—hot with occasional light showers. Flood reported to be falling in Magura and Jhenidah; rising in Bongong. Nacail report not received. Ten annas of <i>aus</i> crop and a large portion of jute crop said to have been destroyed in Bongong and Jhenidah. Fodder very scarce in Bongong.	
		Jhenidah ...	3.86	
		Magura ...	1.04	
		Bongong ...	1.90	
	10 Moorsheadabad „ 6, '90	1.33	Weather—hot. River falling gradually. <i>Aus</i> is still being harvested. Transplantation of <i>amun</i> going on. Distress in affected areas being relieved.	
	11 Dinagpur „ 6, '90	1.14	Weather—warmer. Prospects of crops continue to be favourable. Price of rice unchanged.	
		Thakurgaon ...	2.74	
	12 Rajshahye „ 6, '90	2.82	Weather—hot and cloudy with rain at intervals. In thanas Tanore, Charchat, Baraigram, Lalpur, and Panchupore <i>aus</i> about 2 to 3 annas, jute and a little <i>amun</i> paddy submerged. In the remaining thanas no damage done. Prospects of winter paddy and sugarcane are as yet good. Flood receding.	
Nattore ...		1.09		
	Nowgong ...	1.82		
13 Runpur „ 6, '90	2.77	Weather—cloudy with frequent heavy showers. A good deal of damage reported from the Brahmaputra churs owing to a sudden rise of that river. Otherwise prospects are excellent all round.		
	Nilphamari ...	5.37		
	Kurigram ...	2.46		
	Gaibanda ...	4.29		
14 Bogra „ 6, '90	5.75	Weather—cloudy; south-east wind. <i>Aus</i> and jute are still being reaped. Transplantation of <i>amun</i> still going on. Prospects of crops good. Common rice selling at 18 seers per rupee.		
	Sherpur ...	7.67		
	Nowkhilla ...	6.14		
15 Pubna „ 6, '90	0.55	Weather—hot and cloudy. Jute is being cut. Outturn of <i>aus</i> expected to be 12 annas. Prospects of <i>amun</i> continue good except on low lands. Prices stationary.		
16 Darjeeling „ 6, '90	4.69	Weather—rainy with occasional breaks. Constant showers of rain are doing much good to the winter rice at Terai. <i>Bhutta</i> , <i>chola marua</i> , and potatoes are being harvested. <i>Bhaddi</i> and <i>bara marua</i> progressing well.		
17 Jalpigoree „ 6, '90	6.70	Weather—rainy and cloudy. Transplantation of <i>haimanti</i> paddy not yet finished. Harvesting of jute and <i>aus</i> paddy going on. Price of rice unchanged.		

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.—concluded.			
Eastern Districts.			
Dacca Divn.	18 Dacca Sept. 6, '90	1.06	Weather—seasonably warm and mostly cloudy. <i>Aus</i> paddy and jute being harvested. Some damage done to these crops owing to high flood. <i>Amun</i> paddy thriving. Fodder available, but not in abundance. Common rice sells at from 13 to 15 seers per rupee.
	19 Furreedpur „ 6, '90	0.03	Weather—hot and close. The river has risen more than a foot and-a-half above the last year's highest flood-level. Only about 8 annas of the <i>aus</i> crop could be reaped, and the <i>amun</i> has been damaged to the extent of about 2 annas. If the flood continues to be at its present level for some time more, the damage will be considerable. Price of rice stationary.
	20 Backergunge „ 6, '90	0.84	Weather—hot. Outturn of <i>aus</i> crop estimated at 12 annas. <i>Amun</i> seedlings in many places damaged by high water, and transplantation not yet finished. Common rice selling at about 13 seers per rupee.
	21 Mymensingh „ 6, '90	2.94	Weather—cloudy and hot with occasional rainfall. Harvesting of <i>aus</i> and jute still continues. Transplantation of <i>amun</i> not yet over. Standing crops promising and favourable. Common rice sells at 13½ seers per rupee.
CHITTAGONG DIVN.	22 Chittagong „ 6, '90	7.28	Weather—seasonable. About eight annas of <i>aus</i> cut. <i>Amun</i> transplanted to about ten annas of land by this time. Prospects favourable. Prices steady.
	23 Noakholly „ „	Report not received.
	24 Tipperah „ 6, '90	1.18	Weather—cool and wet at beginning of week, hot and dry at its close. Jute and <i>aus</i> rice being cut. River water unusually high. Price of rice has risen about 3 annas a maund in Chandpore.
	25 Chittagong Hill Tracts. „ „	Report not received.
BEHAR.			
PATNA DIVN.	26 Patna „ 6, '90	Nil	Weather—very hot. Transplantation of paddy nearly finished. <i>Bhadoi</i> crops are being harvested; outturn reported to be poor. Sugarcane doing well. Prices of food-grains generally stationary.
	Barh „ „	0.30	
	Behar „ „	1.61	
	Dinapore „ „	0.95	
	27 Gya „ 6, '90	Nil	Weather—clear. <i>Bhadoi</i> crops are being harvested. Paddy and sugarcane doing well. Prices of food-grains almost stationary.
	28 Shahabad „ 6, '90	0.02	Weather—hot. <i>Bhadoi</i> is being harvested in Sasseram and Bhabuah with an outturn of about four annas. Paddy prospects good. Prices stationary.
	Buxar „ „	1.20	
	Bhabuah „ „	0.05	
	Sasseram „ „	Nil	
	29 Durbhunga „ 6, '90	0.18	Weather—hot and close. Harvesting of <i>marua</i> and <i>makai</i> in progress; outturn expected to be from 8 to 12 annas on an average. Bagmati has again risen, and crops on low-lying lands submerged. Rice crop elsewhere doing well. Prices rising.
	Somastipur „ „	1.74	
	30 Mozufferpur „ 6, '90	Nil	The week has been dry, and no sign of rain at the time of report. Bagmati has risen and flooded a large area of country. Extent of damage cannot at present be ascertained. <i>Makai</i> is being gathered. Prices stationary.
BHAGULPORE DIVN.	31 Sarun „ 6, '90	Nil	Weather—fine and clear. In Sewan and Gopalgunge the <i>bhadoi</i> will be a 3-anna crop and the rice a 12-anna crop; elsewhere nil. Prospects of indigo khuntis very bad.
	32 Chumparun „ 6, '90	Nil	Weather—fine and hot; the season is apparently changing. <i>Makai</i> ripening. <i>Bhadoi</i> rice and <i>kodo</i> being reaped. Winter rice coming on well. Prices almost stationary.
	33 Monghyr „ 6, '90	0.02	Weather—hot and bright. Prospects of winter rice continue favourable. Harvesting of <i>bhadoi</i> finished. Average outturn about 5 annas.
	Beguserai „ „	2.25	
	Jamui „ „	1.23	
	34 Bhagulpore „ 6, '90	Nil	Weather—clear. No rain except slight falls in northern parts and Banka. <i>Bhadoi</i> is being harvested; estimated outturn 12 annas. Prospects of winter rice generally good.
	Banka „ „	0.51	
	Mudhepura „ „	0.8	
	Sonpool „ „	1.9	
	35 Purnea „ 6, '90	0.54	Weather—fine with passing showers. A break in the rains has favoured the <i>bhadoi</i> harvest. Over three-fourths of the early rice has been cut with an outturn of 14 annas. Winter rice promising well except in a few villages in the Arrareah subdivision and in the Bahadurgunge and Balrampur thanas. Damage by floods less than expected. Outturn of jute crop 14 annas.
	Kishengunge „ „	6.37	
	Arrareah „ „	2.36	
	36 Maldah „ 6, '90	0.64	Weather—very hot. Harvesting of <i>bhadoi</i> paddy over. Jute is being cut; a 12-anna crop expected. Winter rice plants thriving. <i>Kalai</i> is being sown in certain places within the jurisdiction of Manickchak outpost. Prices of common rice continue to be from 12 to 17 seers per rupee.
	Chanchal „ „	1.35	
	Snibgunge „ „	0.16	
	Gajole „ „	2.41	
	37 Sonthal Pergha „ 6, '90	0.12	Weather—generally fine. Paddy benefited by the recent break, but more rain wanted in Deoghur. <i>Makai</i> has turned out a poor crop.
	Deoghur „ „	0.7	
	Godda „ „	0.13	
	Jamtara „ „	2.42	
	Pakour „ „	0.20	
	Rajmeha „ „	0.57	

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.			
ORISSA DIVN.	38 Cuttack Sept. 6, '90	1.36	Weather—hot. Harvesting of <i>satika</i> paddy going on. <i>Sarad</i> paddy crop suffering from want of rain in the Jajpur subdivision as well as in the Ershama and Kishennagar outposts of the Sudder subdivision. Prospects elsewhere good.
	Pooree „ 4, '90	3.45	Weather—seasonable. Weeding of <i>sarad</i> crop going on. <i>Beali</i> is being harvested. The subdivisional officer reports that diseases called <i>kahalla</i> and <i>haldi goondi</i> have appeared in the <i>sarad</i> crop. Price of common rice ranges from 18 seers 6 chittacks to 21 seers per rupee.
	39 Khoorda „ „	0.32	
	Banpur „ „	2.07	
	40 Balasore „ 6, '90	0.29	Weather—hot and dry. Fairly good rain has fallen at Bhuddruck, but most parts of the Sudder subdivision are suffering greatly from drought. Prices rising.
CHOTA NAGPORE.			
South-West Frontier Agency.			
CHOTA NAGPORE DIVN.	41 Hazaribagh Sept. 6, '90	Nil	Weather—fine and bright and very warm. Rice crop doing well, but more rain is now wanted. <i>Gundli</i> , <i>marua</i> , <i>goradhan</i> , and Indian-corn are being harvested: all below average. Prices about stationary.
	42 Lohardugga „ 6, '90	Nil	Weather—hot and cloudy. Reaping of <i>gundli</i> going on. Prospect of <i>bhadoi</i> good. Rain wanted for winter rice. No material change in prices of food-grains.
	Palamow (up to 1st Sept.)	3.10	
	43 Singbhoom Sept. 6, '90	1.34	Much more rain wanted, but there seems to be but little hope of any at present. No further damage reported to the rice crop, but unless good rain falls within the next week, much damage will be done. Price of common rice shows a tendency to rise.
	44 Manbhoom „ 6, '90	0.27	Weather—very hot. Break in the rains doing great harm to winter rice crop. Rain urgently wanted. Common rice selling at from 16 to 22 seers per rupee.
	Govindpore „ „	0.24

STATISTICAL DEPARTMENT,
The 8th September, 1890.

P. NOLAN,
Secy. to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of August 1890.

	Inches.	Date.	Hour.
The mean pressure of the month	29.627		
The average pressure of August from 24 years' registers ...	29.598		
The highest pressure in the month	29.752	26th	10
The lowest pressure in the month	29.463	10th	16
The range of pressure	0.289		
Hours.			
The total number of hours of bright sunshine during the month	122.3		
The maximum possible number of hours of sunshine ...	398.4		
°			
The mean temperature of the month	82.5		
The average temperature of August from 24 years' registers	83.1		
The highest temperature in the month	89.8	4th and 18th.	
The lowest temperature in the month	74.6	22nd.	
The range of temperature during the month	15.2		
The mean daily range of temperature	9.8		
The greatest range of temperature in one day	14.5	5th.	
Per cent.			
The mean humidity of the month	87		
The average humidity of August from 24 years' registers ...	86		
Inches.			
The mean vapour pressure of the month	0.964		
The average vapour pressure of August from 9 years' registers	1.002		
The mean cloud proportion of the month	7.41		
The average cloud proportion of August from 13 years' registers	8.09		
The total rainfall of the month	9.04		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	8.85		
The average fall of August from 48 years' registers ...	13.94		
The greatest fall in 24 hours	1.74	5th.	
Days.			
The number of rainy days in the month	23		
The average number of rainy days in August from 24 years' registers	25		
°			
The mean maximum equilibrium temperature of solar radiation during the month	144.3		
The mean difference of sun and air temperatures	57.5		
The greatest sun temperature	155.7	4th.	
The greatest excess of sun over air temperature	67.9	13th.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	75.7		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	1.8		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	3.3	17th.	
Miles.			
The mean movement of the wind per day	67.6		
The greatest movement of the wind in one day	142.0	28th.	
The greatest movement of the wind in one hour	15.0	28th noon to 1 P.M.	
The number of hours with winds from each of the 8 points—			
N. 2, N.E. 9, E. 50, S.E. 134, S. 241, S.W. 134, W. 16, N.W. 1, Calm 157.			

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore .003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0.6 higher; and finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0.6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 8th September 1890.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS
TAKEN IN ASSAM, FOR THE MONTH OF AUGUST 1890.**

THE chief peculiarities in the weather of the month of August have been—

- (1). Pressure has been either normal or slightly above the normal, and though it has never differed much, there is a moderate excess in the means for the month.
- (2). Temperature has been slightly below the normal in the southern and largely below in the northern districts, especially during the latter half of the month.
- (3). Rainfall has been scattered in Lower Bengal throughout the month, and was very scanty in the northern districts during the first two weeks, but during the last two heavy and general rain fell, and in consequence the total falls in the northern half of the province are several inches above the normal.
- (4). Stormy weather has never occurred, but several very unimportant depressions formed off the Orissa Coast and either filled up shortly afterwards or moved in a north-westerly direction. The only effect of these depressions in Bengal was slightly higher wind velocities for a day or two, and the scattered rainfall in the early part of the month when most of them occurred.
- (5). Very light winds have been blowing except in the eastern districts, as is shown by a table given below of velocities at a few coast stations.

During the first half of the month, the trough of low pressure extended from the head of the Bay in the usual north-westerly direction, and the wind circulation was without interruption southerly or easterly in East and North Bengal and Behar, but in Orissa, South-West Bengal, and Chutia Nagpur wind directions were more variable because of the influence of the shallow depressions, three of which formed during the first two weeks. The monsoon current flowing over the province during this period was, therefore, entirely from the Bay, and as it passed without interruption into the North-Western Provinces, very little rain fell in Bengal. Conditions changed during the second half of the month. The trough of low pressure either moved close up to the hills, or the distribution over Bengal was very uniform, in both of which cases the moist current from the west of India was likely to force its way over the western districts and at times the whole of Bengal. In North Bengal and Behar frequent changes of winds from east to west occurred, and then rainfall was heavy and general. From the 17th to the 19th westerly winds were blowing as far east as Dinagapore, but on the 20th a shallow diffused depression over the head of the Bay and South-West Bengal gave the usual cyclonic circulation, which continued till the 22nd, after which westerly winds blew for several days, and again towards the end of the month. The heavy rain in Behar and North Bengal was probably due to the western current as that from the Bay was very weak, or perhaps to the interference of the two currents, an upward motion and greater condensation probably resulting.

The depressions during the month have, as stated above, been unusually feeble and at times would have been hardly noticeable but for a faint cyclonic circulation. The first began on the 2nd, close to the coast of the Circars, where it remained deepening slightly, but almost without change of position till the 6th, when it moved in a north-westerly direction into Central India. On the 9th pressure was again lowest at the southern end of the trough off the Orissa Coast, and winds were irregularly cyclonic at a few neighbouring stations, but on the 10th a considerable deepening occurred in the Central Provinces, which caused strong easterly winds over the whole of Bengal with the exception of Orissa. This shallow low pressure area moved to the north-west and filled up, after which pressure was again lowest over the western districts of Bengal, from which a similarly shallow depression moved to the west and filled up several days afterwards in the North-West Provinces. Up to this date, therefore lowest pressure was either over Orissa or the western districts, and hence steady southerly and easterly winds were blowing except near the depressions. During the latter half of the month two very shallow depressions formed at the head of the Bay, the first on the 19th and the second on the 26th. They both moved in a northern direction over Bengal where they filled up, leaving the pressure distribution very uniform, and caused the inrush of westerly winds which was followed by the heavy rainfall in the northern districts during these days.

In the following table are given the actual daily wind velocities for August, compared with the normal values for the same period at stations on and near the coast line from Akyab to Gopalpore. At all of these, except Dacca, the velocity is below the normal, the greatest differences being at Calcutta, Saugor Island, and Gopalpore. In August of last year the mean velocity at the various stations was very similar to that of the present year, and then rainfall was deficient in all districts except Orissa, but the trough of low pressure retained its position well to the west of the province, instead of closing up towards the hills about the middle of the month. This tends to show that if the western current had been prevented by the low pressure area from flowing over Bengal, rainfall would have been

again below the normal in the northern districts owing to the very weak monsoon at the head of the Bay.

STATIONS.			Actual average wind velocity for August 1890.	Normal wind velocity in August.	Variation of actual for August from the normal.
			Miles per day.	Miles per day.	
Akyab	72	120	- 48
Chittagong	134	144	- 10
Dacca	196	168	+ 28
Jessore	80 ²	120	- 40
Calcutta	68	168	-100
Saugor Island	359	456	- 97
Balasore	123	144	- 21
False Point	228	288	- 60
Pooree	260	288	- 28
Gopalpore	248	360	-112

Pressure—Was considerably above the normal during the first few days of the month, after which a steady fall continued till the end of the first week. The largest excess was on the 4th, when it varied from .1 inch to .15 inch in all districts except Chutia Nagpur, Orissa, and Assam. During the second week there was generally a small defect, and while the shallow depression existed, defect within it was only a little over a twentieth of an inch. Mean defect was about .03 inch in South-West Bengal, Chutia Nagpur, and South Behar, while in the other districts it was rarely over .1 inch. Changes continued to be very unimportant in the latter half of the month, but the distribution was steadily above the normal by amounts ranging up to a twentieth of an inch. As there was a slight defect during the second week only, the means for the month are everywhere above the normal by between two and three hundredths of an inch.

Temperature—Notwithstanding a partial break in the rains, which gradually extended over the province—has rarely been above the normal, and then these higher temperatures generally occurred in the south-west. For the first week means were practically normal in Orissa, South-West Bengal, and East Bengal, and below elsewhere by amounts between 4° in Chutia Nagpur and 2.1° in North Behar. In the second week greater irregularity occurred, and excess was confined to the northern districts. After rainfall became more general, low temperatures were again recorded in Behar and North Bengal, and till the end of the month considerable defect prevailed. During the third week temperature was about 1° above the normal, but towards the end of the month lower temperatures were general, and means were normal, in South-West Bengal and about 1° below in the other districts except North Bengal, where the difference was slight and Assam where it exceeded 2°. The monthly mean for South-West Bengal is normal, and for the other districts below the normal, defect being under half a degree in Orissa and East Bengal and between 1° and 1.5° in Behar and Assam.

Rainfall—Has been deficient in Orissa, South-West Bengal, East Bengal, and Chutia Nagpur, and above the normal in Behar and North Bengal, defect in South-West Bengal being 4.1 inches, in Chutia Nagpur 3.42 inches, in Orissa 2.25 inches, and in East Bengal 1.83 inches; while excess in North Bengal is 4.36 inches, in North Behar 3.94 inches, and in South Behar 2.78 inches. These differences are from 20 to 30 per cent. of the normal except in East Bengal, where it is only 12 per cent. In these southern districts the total rainfall up to the end of August does not differ from the normal by more than 6 per cent., but in North Behar excess is 39 per cent., in South Behar 33 per cent., and in North Bengal 21 per cent.

The comparison of the actual rainfall in the various large divisions of the province with the normal is most accurately and conveniently shown in the form of a percentage. The figures representing the rainfall for the month, calculated in this way, are included in the table below under the heading of August. This table really gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division, the first eight divisions giving the actual average rainfalls in each division in each month expressed as a percentage of the normal, while the ninth column gives the total rainfall for the first eight months expressed as a percentage of the normal rainfall for that period—

METEOROLOGICAL DIVISIONS.	January.	February.	March.	April.	May.	June.	July.	August.	Actual rainfall of first eight months of 1890, expressed as a percentage of the normal fall for the period.
Orissa	24	5	216	20	99	124	97	80	96
South-West Bengal	98	Nil	39	75	87	141	102	69	94
East Bengal	181	4	70	122	102	89	120	88	99
North Bengal	98	Nil	26	155	81	132	129	132	121
North Behar	38	2	25	40	95	140	174	134	139
South Behar	Nil	5	63	80	95	183	136	125	133
Chutia Nagpur	Nil	Nil	120	1	65	132	116	75	97

Falls of more than 15 inches have been received in the south-east corner, including the Sunderbuns, Noakhally, and Chittagong; in parts of the north of Chutia Nagpur, chiefly in the Hazaribagh and Manbhoom districts; in Gya and Patna, in South Behar; in the greater

part of North Behar, the exceptions being parts of North Bhagulpore, Durbhunga, and Mozufferpore; and over the whole of the northern half of North Bengal. Falls under 10 inches are confined to the north of Orissa, the south of Chutia Nagpur, the greater part of South-West Bengal, and irregular portions of East Bengal. The heaviest falls in North Bengal are Buxa 51.48, Alipore Dooars 46.07, Cooch Behar 45.36, Matabhanga 43.35, Kurseong and Mickilgunge 37.64, Bhagatpore 37.06, and Julpigoree 31.07 inches. Falls over 20 inches have been received in North Behar at the following stations:—Kissengunge, Balarampore, Kaliagunge and Bagaha; in South Behar at Gya, Aurungabad, and Arwal; in East Bengal at Cox's Bazar, Chittagong, Noakhally, Fenny, and Durgapore. The following stations received less than 5 inches:—Kurdah in Orissa; Garbetta, Bankoora, Bishenpore, Khatra and Anda in South-West Bengal; Daudkandi and Kusba in East Bengal.

As compared with the normal, heavy falls have been received in the south of Orissa, the west of Chutia Nagpur and South Behar, the whole of North Behar and North Bengal; while defect of more than 4 inches is recorded in the east of Chutia Nagpur, the west of South-West Bengal, the Sunderbuns and part of Tipperah. Defect is over 8 inches at the following stations in South-West Bengal and Chutia Nagpur, Tumlook, Bankoora, Khatra and Raipore, and over 10 inches at Chyebassa, Ghattal, Garbetta and Bishenpore. Excess is over 8 inches at Hajipore and Maldah, over 10 inches at Raigunge, Kissengunge and Gya, over 15 inches at Mickilgunge and Aurungabad, and over 20 inches at Cooch Behar and Matabhanga.

The following table gives full data for the comparison of the actual and normal rainfall of the month of August in all districts of the province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance or weight being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the weekly and monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past fifteen years; the second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district; the third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage; the fourth column states as a percentage how much the district rainfall of the month varied from the normal—

Percentage Table for August 1890.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last year. The humidity of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by c and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional stations for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 5th of September 1890.

Explanation.—.....indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, the 9th September 1890.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE
5TH OF SEPTEMBER 1890.**

WEATHER during the past week has been notable for (1) the westerly current which has been blowing steadily in all districts except East Bengal and at times North Bengal: (2) the break in the rains which, being caused by the dry westerly winds, commenced in the western districts in the beginning of the week and gradually spread over the greater part of the province: (3) the high temperature which has resulted from the clear skies and scanty rainfall over the greater part of Bengal.

At the commencement of the week pressure was low along the foot of the hills, and as the difference from the normal was about a tenth of an inch in North Bengal and Assam, westerly winds forced their way as far east as Dhubri. Rainfall was confined to the east and south of the province, where heavy showers continued to fall. Temperature was everywhere considerably below the normal, but a rise of between 1° and 3° was general in the west of Behar, and as rainfall ceased it rose at nearly all stations, defect almost disappearing by the 1st of September. Pressure oscillations were very small throughout the week, and the distribution, though tending to become more normal in North Bengal and North Behar, was not affected to such an extent as would cause a change in the wind circulation. The interference of the southerly winds from the Bay blowing over East and North Bengal with the westerly current from Behar caused the heavier rainfall in these eastern districts, and in part of North Bengal falls were general and heavy throughout the week, while in East Bengal moderately heavy showers fell at nearly all stations during the first half. In Orissa and South-West Bengal the showers were fairly general on the 30th and 31st of August and again on the 3rd of September, but on other days, as in Behar and Chutia Nagpur, practically no rain has been received.

Pressure—Fell briskly on Saturday, the first day of the week, giving lowest readings along the foot of the hills and the greatest difference from the normal in North Bengal and Assam, but on other days changes have been small: first, slowly upwards till the distribution was very nearly normal, and again downwards towards the end of the week. The means for the week in South-West and East Bengal differ from the normal by a few thousandths of an inch only; they are above in Orissa and Chutia Nagpur by about two-hundredths, and below in North Behar and North Bengal and Assam by amounts ranging up to four-hundredths of an inch.

Temperature—Was at first two or three degrees below the normal in Lower Bengal and more than 5° in North Bengal and Assam, but the steady rise which has been going on throughout the week, brought it up to three or four degrees above the normal in all districts except North Bengal and Assam, where there was still a small defect on September 5th, the last day of the week. Defect in the mean for the week is 2.3° in Assam, 1.6° in South-West Bengal, 1.3° in Orissa, and $.5^{\circ}$ in North Bengal, while excess is 1.1° in Chutia Nagpur and $.9^{\circ}$ in Behar. The mean for East Bengal is practically normal.

Rainfall—As stated above, was scattered in the south-western districts on Saturday, Sunday, and Wednesday, and almost absent on the other days. Scattered showers also fell in North Behar on Saturday and Sunday, but, with the exception of these showers, very little rain fell in Behar or Chutia Nagpur. Almost general rain fell in East Bengal and the southern districts of North Bengal during the first half of the week and in the northern half of North Bengal throughout the week. The actual falls expressed as percentages of the normal falls for the large subdivisions are as follows:—North Bengal 108, Orissa 67, South Bengal and East Bengal 62, North Behar 26, Chutia Nagpur 7, and South Behar 2.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 5th of September 1890:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.								
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of August.		Since 15th May 1890.

The mean pressure of the seven days	Inches.
The average pressure of the corresponding period for 24 years, S.-G.'s Office	29.669
The total number of hours of bright sunshine	Hours.
The maximum possible number of hours of sunshine	40.8
The mean temperature of the seven days	84.4
The average temperature of the corresponding period for 24 years, S.-G.'s Office	83.5
The extreme variation of temperature	18.1
The maximum temperature	92.7
The highest velocity of the wind in one hour	Miles.
The highest pressure of wind on one square foot	10 lbs.
The mean relative humidity	Not measurable.
The average relative humidity of the corresponding period for 24 years, S.-G.'s Office	84%
	86

The total fall of rain from 31st August to 6th September 1890	Inches.
The average fall of the corresponding period for 24 years, S.-G.'s Office	1.04
The total fall from 1st January to 6th September 1890	2.48
The average fall of the corresponding period for 24 years, S.-G.'s Office	41.21
	50.50

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; t, thunder; p, passing temporary showers; d, drizzling rain; lr, lightning reflection; d, dew.

J. H. GILLILAND,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA ;

The 8th September 1890.

MEMORANDUM.

Monthly review of deaths registered in forty-five districts of Bengal for the month of May 1890.

[THE delay in the publication of this review is due to the non-receipt of the Julpaiguri district return, which was received in this office on the 2nd instant, more than *three* months after the month to which it relates.]

The deaths registered in forty-five districts of Bengal during the month of May 1890 were 124,450, and correspond to an annual rate of 22·56 per 1,000 of the aggregate population of those districts, which is 65,859,534. This rate is 1·32 higher than the mean rate of the corresponding months of the past five years 1885–89, and is also higher than the rate of the corresponding period of any of the past five years, except 1887, *vide* the figures below—

	May 1885.	May 1886.	May 1887.	May 1888.	May 1889.	Monthly average of five years, 1885–89.	May 1890.
Ratio of deaths per 1,000 of the population per annum	20·64	18·24	25·44	21·00	20·88	21·24	22·56

The following table shows the highest proportions of deaths registered during the month of May 1890, compared with the corresponding month of 1889 :—

<i>Districts.</i>		Ratio per mille during—		<i>Districts.</i>		Ratio per mille during—	
		May 1890.	May 1889.			May 1890.	May 1889.
Darjiling	...	59·76	45·84	Durbhunga	...	31·20	13·68
Monghyr	...	39·84	18·96	Hazaribagh	...	31·20	21·36
Patna	...	34·56	17·52	Chumparun	...	30·36	15·00
Bhagulpore	...	34·20	23·88	Lohardugga	...	30·36	17·40
Julpaiguri	...	33·24	44·16	Shahabad	...	28·44	15·96
Noakhali	...	32·64	30·36	Gya	...	28·08	15·60

Except in the case of Julpaiguri the figures of May 1890 show a distinct advance towards accuracy in death registration in the districts mentioned which is encouraging.

The total mortality during the month under review from the several registered death-causes is compared in the following table with the mortality from those causes in the corresponding month of 1889 and the average of the five years 1885–89 :—

				Ratio per mille during—		
				May 1890.	May 1889.	Monthly average of five years 1885–89.
Cholera	2·88	4·08	3·60
Small-pox	·24	·12	·12
Fever	15·84	12·72	13·68
Bowel-complaints	·48	·60	·72
Injury	·36	·36	·36
Other causes	2·52	2·64	2·52

Compared with the figures of both the past periods, there is a noticeable increase in the mortality of May 1890 under the head fever, and a sensible decrease in the death-rate from cholera.

The highest annual death-rates from cholera and fever occurred in the following districts :—

<i>Cholera.</i>				<i>Fever.</i>			
			Ratio per mille.				Ratio per mille.
Monghyr	13·68	Darjiling	46·08
Bhagulpore	12·24	Julpaiguri	28·92
Durbhunga	11·64	Noakhali	28·92
Chumparun	11·64	Hazaribagh	27·12
Maldah	7·68	Shahabad	25·56
Patna	6·72	Gya	23·88
Purneah	5·88	Lohardugga	23·52
Chittagong	2·64	Monghyr	23·40
Mozufferpore	2·64	Patna	22·20
Julpaiguri	2·52				
Rajshahye	2·28				
Saran	2·28				

From small-pox high mortality occurred only in the district of Chumparun—mortality 3·12 per 1,000 of population.

SUPPLEMENT TO THE CALCUTTA GAZETTE, SEPTEMBER 10, 1890. 1851

The mortality of the month under review, according to *Sex*, *Class* and *Age*, was distributed as follows:—

<i>According to Sex.</i>		<i>According to Class.</i>		<i>According to Age.</i>	
	Ratio per mille.		Ratio per mille.		Ratio per mille.
Males ...	24.60	Christians ...	14.52	Under 1 year ...	133.32
Females...	20.64	Hindus ...	23.76	1 and under 5 years	24.60
Ratio of male deaths to every 100 female deaths calculated on the proportion such mortality bears to the total male and female population ...	119	Mahomedans ...	20.68	5 " 10 "	11.88
		Buddhists ...	21.24	10 " 15 "	10.68
		Other classes ...	23.76	15 " 20 "	14.88
				20 " 30 "	15.60
				30 " 40 "	18.00
				40 " 50 "	23.64
				50 " 60 "	33.24
				60 years and upwards	52.68

Detailed information regarding the mortuary statistics of the forty-five districts of Bengal during the month under review will be found in the statement appended.

The 4th September 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 23rd August 1890.

BIRTHS.

The births registered during the week ending with Saturday, the 23rd August 1890, in twenty-seven principal towns of Bengal correspond to an annual rate of 20·7 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 2·7 lower than the average rate of the corresponding week of the past five years, and is also lower than the rate of the corresponding week of any of the past five years, except 1887 and 1888—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885-89.	1890.
Ratio of births per 1,000 of the population per annum	30·0	23·4	19·1	19·8	24·5	23·4	20·7

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

Towns.	WEEKS ENDING—				Towns.	WEEKS ENDING—			
	2nd August 1890.	9th August 1890.	16th August 1890.	23rd August 1890.		2nd August 1890.	9th August 1890.	16th August 1890.	23rd August 1890.
Burdwan	13·7	13·7	15·3	16·8	Narainganj	24·8	16·6	33·1	16·6
Midnapore	15·5	13·9	12·4	18·6	Chittagong	4·7	4·7	16·4	9·4
Hughli and Chinsurah	14·8	16·4	6·6	14·8	Comillah	15·4	11·5	11·6	19·3
Serampore	27·5	23·6	23·6	13·7	Patna City	14·9	13·3	13·6	15·3
Utterpara	18·9	18·9	9·4	37·7	Gya	17·8	21·9	28·7	31·4
Howrah	17·8	14·3	18·3	21·8	Arrah	13·3	20·3	26·3	41·9
Bali	19·5	7·0	7·0	21·1	Mozufferpore	14·6	17·0	18·2	18·2
Krishnagar	6·7	11·4	13·3	18·9	Durbhanga	19·7	29·9	18·1	18·9
Ranaghat	6·0	24·0	6·0	12·0	Chupra	6·0	2·0	12·1	18·1
Santipore	14·0	17·5	14·0	14·0	Bhagulpore	18·1	23·6	25·3	24·4
Jessore	18·4	6·1	12·2	12·2	Monghyr	23·5	38·9	40·7	37·1
Rampore Beaulah	31·5	15·8	36·8	34·2	Purneah	10·4	13·9	6·9	...
Darjiling	7·4	37·0	22·2	88·9	Poori	6·3	12·6	6·3	12·6
Dacca	11·0	14·9	17·5	10·4	Total	18·3	17·4	18·7	20·7

It will be seen that last week the highest birth-rate was returned from Darjiling (88·9), and the lowest from Chittagong (9·4). No births were registered during the week in Purneah town.

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 24·8 per 1,000 of the population. The rate of the week is 8·2 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years with which comparison is instituted—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885-89.	1890.
Ratio of deaths per 1,000 of the population per annum	48·9	26·7	29·0	32·5	27·6	33·0	24·8

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population:—

Towns.	WEEKS ENDING—				Towns.	WEEKS ENDING—			
	2nd August 1890.	9th August 1890.	16th August 1890.	23rd August 1890.		2nd August 1890.	9th August 1890.	16th August 1890.	23rd August 1890.
Burdwan	19·8	13·7	10·7	16·8	Narainganj	16·6	12·4	16·6	24·8
Midnapore	7·7	15·5	17·0	23·2	Chittagong	11·7	9·4	21·1	16·4
Hughli and Chinsurah	26·3	18·1	31·2	19·7	Comillah	26·9	7·7	23·1	26·9
Serampore	51·0	51·0	33·4	49·1	Patna City	13·0	20·1	15·3	20·4
Utterpara	37·7	9·4	87·7	18·9	Gya	44·4	56·7	56·7	66·3
Howrah	10·9	20·0	19·5	17·8	Arrah	8·4	20·3	13·2	12·0
Bali	14·0	10·3	24·6	28·1	Mozufferpore	15·8	33·1	20·7	25·6
Krishnagar	5·7	11·4	11·4	15·1	Durbhanga	16·5	34·6	27·6	14·9
Ranaghat	24·0	24·0	12·0	20·9	Chupra	11·1	3·0	15·1	16·1
Santipore	17·5	19·3	14·0	26·3	Bhagulpore	14·5	12·7	24·4	12·6
Jessore	12·2	13·2	18·4	55·1	Monghyr	15·4	28·9	21·7	22·5
Rampore Beaulah	15·8	21·0	34·2	26·3	Purneah	13·9	24·2	13·9	24·2
Darjiling	88·9	66·7	66·7	37·0	Poori	33·6	23·1	25·2	42·0
Dacca	27·2	25·3	20·1	24·7	Total	19·2	23·3	22·8	24·8

It will be seen that last week the highest mortality occurred in the town of Gya (66·3) and the lowest in Arrah (12·).

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follows:—

<i>Cholera.</i>			<i>Fever.</i>			<i>Other causes.</i>		
		Ratio per mille.			Ratio per mille.			Ratio per mille.
Santipore	...	15·8	Jessore	...	36·7	Gya	...	21·1
Mozufferpore	...	13·4	Gya	...	29·4	Serampore	...	19·6
Gya	...	13·0	Rampore	Beauleah	23·6	Poori	...	18·9
Patna City	...	7·8	Comillah	...	23·1			
Chupra	...	4·0	Poori	...	20·8			

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 3·7 from cholera, against 3·5 per 1,000 in the preceding week; 10·5 from fever, against 9·4; 2·7 from bowel-complaints, against 3·9; 7·4 from other causes, against 5·4 in the preceding week. Small-pox and injury exhibit the same ratios as in the preceding week, viz., ·1 and ·4 respectively.

The mortality of last week according to *Sex*, *Class*, and *Age* was as follows:—

<i>According to Sex.</i>			<i>According to Class.</i>			<i>According to Age.</i>		
		Ratio per mille.			Ratio per mille.			Ratio per mille.
Males	...	25·4	Christians	...	7·5	Under 1 year	...	180·3
Females	...	24·1	Hindus	...	27·2	1 and under 5 years	...	38·0
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population	...	105	Mahomedans	...	19·1	5 " 10 "	...	21·7
			Other Classes	...	76·8	10 " 15 "	...	15·1
						15 " 20 "	...	18·0
						20 " 30 "	...	12·8
						30 " 40 "	...	11·9
						40 " 50 "	...	15·0
						50 " 60 "	...	27·5
						60 years and upwards	...	62·5

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,

Sanitary Commissioner for Bengal.

The 8th September 1890.

Statement showing the Results of the Registration of Births and Deaths in the principal Municipalities in Bengal during the week ending with Saturday, the 23rd August 1890.

Comparative statement of the principal commodities carried over the Eastern Bengal State Railway during the month of June 1890.

INCREASES.		Tons.
Rice	...	2,261
The increase was contributed by the Southern and Behar Sections. The Northern Section showed considerable fluctuations during the month.		
Betel-nuts	...	522
Principally from Bengal Central Division stations carried via the Bengal Central Railway.		
Railway plant, &c.	...	7,758
For repairs and renewals.
Salt	...	1,472
The principal increase was from Chitpore.		
DECREASES.		
Coal	...	16,678
Short outturn from collieries.
Cotton piece-goods	...	724
Ordinary fluctuations.
Oil-seeds	...	1,817
Bogoola, Kissengunge, Chooananga, Damukdia, Jagati, Kooشته, and Serajganj show considerable decreases, said to be due to the dullness of the market.		

CALCUTTA, the 2nd September 1890.

F. P. QUINLAN,
Examiner of Accounts.

Weekly Return of Traffic Receipts on Indian Railways.

EAST INDIAN RAILWAY.

Approximate Return of Traffic for week ended 30th August 1890, on 1,525½ miles open.

* The decrease in coaching traffic is partly due to a larger number of 3rd class Government passengers booked from the N.W. Ry. via Ghaziabad to Howrah in the corresponding period of 1889, and partly to a lesser traffic at Howrah, Allahabad, Cawnpore, and Delhi and some minor stations.

Approximate Statement of gross receipts of the East Indian Railway, prepared in accordance with Public Works Department Circular No. XXI. Railway, dated 23rd July 1883.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE BHAGULPORE DIVISION FOR THE YEAR 1889-90.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 16th September, 1890.

RESOLUTION.

READ—

The Annual General Administration Report of the Bhagulpore Division for the year 1889-90.

The divisional report is written by Mr. Quinn, who took charge of the office of Commissioner only during the last month of the year, and all the district reports, except that

Tour.

of Maldah, have been submitted by Collectors who were without personal experience of the facts recorded. This consideration affects specially the account given of the annual tours, which can be of much interest only when it is made by the officers who travelled. The arrangements of the Commissioner were disturbed by illness, more or less severe, and the same cause prevented the Collectors of Monghyr, Bhagulpore, and Purneah from devoting to inspection duty the full period prescribed. In Purneah the tour was insufficient owing to changes of officers during the year. The Lieutenant-Governor notices with satisfaction that the tours of the Sub-divisional Officers were in every instance complete.

2. The outturn of the harvest of 1888-89 was seriously deficient, being

Crops, prices, and condition of the people. on the divisional average 10½ annas for rice and 10 annas for wheat, while in the Bhagulpore district

the rice harvest was 8 annas only. In the natural sequence prices were high during 1889-90, common rice averaging $15\frac{1}{4}$ seers a rupee against $17\frac{5}{8}$ seers in the previous year. In the Soopol sub-division of Bhagulpore there was a tract classified as distressed where relief operations were undertaken in accordance with the Famine Code. Mr. Wace, Collector of Bhagulpore, observes—

“In those tracts which suffered from the drought of 1888, there was great cause for anxiety in the early part of the year in respect of both the small cultivators and the labourers. The latter were helped by the relief works which were started at various points, but things never got bad enough to drive those classes which are ordinarily above labour on to the works. All through April and May these classes were much pinched in the north-east of Soopol, the north-east and centre of Banka, and in the south-west of the Sudder sub-division. The village mahajun's heart remained as hard as the ground till the rains fell, and ryots seemed to think that Government would repeat the lavish operations of 1874. Advances were, however, kept for the tracts specified above. In Naradigur our work was well supplemented by the Maharaja of Durbhunga. As usual the mahajun came forward when the rain fell at last, and an increase in the registration returns under mortgages and sales shows that he was used more freely than usual, and I fear the year closes with the small cultivators more indebted than ever. They have, however, benefited by getting better prices for the surplus of the harvest just over than they could have expected considering its abundance. The Managers of the Durbhunga Raj and of the Srinagore estate each reports that the advances they made are being rapidly paid up.”

The crop of 1889-90 was distinctly better, averaging $14\frac{2}{3}$ annas for rice, $11\frac{1}{2}$ annas for wheat; but prices have been even higher, perhaps because stocks had been depleted, and the harvest, though tolerable, was not sufficient to replenish them. In Maldah wages of unskilled labour are reported to have risen during the last two years with the price of food, being 3 to 4 annas a day against 2 to 3 annas in 1887-88, and a similar tendency is observed in the district of Purneah. In Monghyr, Bhagulpore, and the Sonthal Pergunnahs no change has been observed in the former rate of two annas a day, as to which the Commissioner, moreover, observes that he does not believe the ordinary agricultural labourers are so highly paid in the interior of the district. Mr. Quinn states that “it may safely be said that the general condition of the people affords no ground for despondency, and that they were distinctly better off at the close than at the beginning of the year. The picture of the Sonthal Pergunnahs, as drawn by the Deputy Commissioner, is decidedly cheerful.” It is probable that the ryots have derived advantage from the high price of rice during the year, their harvests not being deficient, though some portion of the surplus must have gone to replenish stocks and pay debts contracted during the bad season of 1888-89. The labourers north of the Ganges have received full compensation for the enhancement in the cost of living by a rise in wages, and the fact is one of the most assuring observed in recent years. South of the Ganges, in so far as they are paid in money, the working classes must have suffered.

3. In the districts south of the Ganges there was a considerable increase in the number of registered deaths, which were 63,308 in Monghyr against 53,213 in the previous year, 52,214 in Bhagulpore against 48,239, and 28,530 in the Sonthal Pergunnahs against 21,140. The cause of the variation is not explained, but it seems that the year 1888-89 had been unusually healthy, and the high price of provisions must have affected unfavourably the condition of the poorest class in 1889-90. In the districts north of the Ganges, where there is less poverty, the death-rate did not increase. Of Purneah the Commissioner writes—

“The chief feature as regards the health of this district was the great epidemic of cholera which, spreading from the Karagola fair in February 1889, in which month only 125 deaths were recorded, caused 6,198 deaths in March and reached its maximum in the appalling total of 10,232 deaths in April, the first month of the official year under report. The epidemic came to an end in May, in which month 625 deaths were recorded. Two special Civil Hospital Assistants were deputed to the Arrareah sub-division, and cholera medicines were given away freely by the District Board. The total number of deaths from cholera registered during the official year was 12,690 against 883 in the previous year. Deaths from fever amounted to 36,231 against 40,609 in the preceding year. There was practically no small-pox, a result attributed by the Civil Surgeon to the efficiency of the Vaccination Department. The total number of deaths registered in the district during the year was 49,418 against 41,661 in the preceding year. Speaking generally, the health of the district was, except for the cholera epidemic, better than usual. The heavy rain and floods appear to have lessened the tendency to malarious fever.”

The Lieutenant Governor notices with pleasure the statement that vaccination has been fairly maintained throughout the Division, and there was no serious outbreak of small-pox, though in some districts the deaths from this cause were more numerous than in the preceding year.

4. The statistics of manufactures appended to the report are valuable as a beginning, but cannot be relied upon in every case. It is, for instance, impossible to believe that the value of indigo produced in Bhagulpore, returned at over eleven lakhs in 1888-89, had declined to little more than half a lakh in 1889-90. In regard to trade, the increased importation of food and the diminished importation of piece-goods are explained by the failure in the crops of the previous year. There was a marked falling off in the export of piece-goods to Nepal, attributed to the existence of an accumulated stock in that country. The Commissioner observes—

“The opening of the part of the Purneah Section of the Assam-Bihar State Railway from Kusa to Forbesgunge during the year has considerably changed the trade routes of the western and northern parts of the Arraheah and Sudder sub-divisions. Produce is now brought from Nepal to Forbesgunge, and thence taken to the Manihari Ghat, where it is shipped and carried westwards by river to Revilunge. The Kusi boat trade is being abandoned in favour of the railway.”

In Purneah the Collector mentions as a new feature in the trade of the district that in Kishengunge the people are beginning to form joint stock companies, and are gradually superseding the Bengali merchants who used to monopolise the trade at that place.

5. The Commissioner reports favourably of the working of the magistracy, and in particular of the Honorary Magistrates and Benches. Progress was made in securing the regular payment of chowkidars and their attendance at the police-stations. On the other hand the police are said to have done well only in the district of Maldah, and there was an increase in crime, the total number of cognizable cases being 15,864 against 14,507 in the previous year; of non-cognizable complaints 11,395 against 10,905. This is but partly explained by the large number of prosecutions under Municipal and special Acts.

6. The collections on the large Government estate of Damin-i-Koh in the Sonthal Pergunnahs were satisfactory, as with a rent roll of Rs. 1,69,497 there were no remissions and a balance uncollected of only Rs. 832. But in the division generally the arrears at the end of the year were large, amounting to 6·2 per cent. of the land revenue demand, and it is remarkable that even on permanently-settled estates the outstandings were considerable, being 5 per cent. of the demand. More than a tenth of the estates defaulted during the year, and 152 were actually sold. In the face of these results, it is not understood how the Commissioner comes to consider that the present system of working the Sale Laws in Bhagulpore Division, which apparently consists in treating the day of auction as the last day for payment, has secured the revenue without hardship to individuals. It is not, however, desirable to make any great change by executive orders at present, as the law on the subject will probably be recast at no distant date. The report does not state what progress has been made in the large settlements of private estates by public authority which have been in progress during the year in Bhagulpore, Monghyr, Purneah, and the Sonthal Pergunnahs, though they constituted the most novel and not least important of the proceedings taken by Government in connexion with agrarian matters.

7. The Lieutenant-Governor notices with satisfaction an increase in the number of schools from 4,785 to 5,293, and of pupils from 88,473 to 93,947. This extends to institutions of all classes except those entered as “middle vernacular.” It is specially observed that primary education has been a distinct advance both among boys and girls, and that candidates from the Division did well at the Entrance examination of the Calcutta University.

8. The Commissioner reports that local bodies appear to have on the whole worked fairly well during the year, though the record is not entirely satisfactory. The Lieutenant-Governor was very favourably impressed by the readiness with which the Bhagulpore District Board co-operated in the work of relieving distress.

9. The rate at which this contribution is levied was changed during the year in all districts, being lowered in two and raised in three. Zemindary dāk. Zemindars have recently objected to such annual alterations as making the incidence of the change uncertain, and changes should be avoided when this can be conveniently arranged. The Lieutenant-Governor would indeed be glad to meet a wish, once expressed by the head of the Postal Department, to commute this fluctuating impost for a fixed demand, settled in perpetuity, and a proposal for commutation has also been put forward on the part of the zemindars, though on pecuniary terms, which are not admissible.

10. Favourable mention is made of the Maharajah of Durbhanga, whose estates extend into Bhagulpore, of Maharajah Taruk Nath Ghose, and of Mr. Grant, in the Sonthal Pergunnahs, for liberal management of their property.

11. The thanks of the Lieutenant-Governor are given to Mr. Stevens for efficient management of the division during the greater portion of the year. His successor, Mr. Quinn, has also given indications of administrative ability. The report bears witness to the many excellent qualities of the late Mr. Coxhead, whose premature death Sir Stuart Bayley has had to deplore since the close of the year. Mr. Wace's excellent work in connexion with the scarcity in his district attracted the special notice of the Lieutenant-Governor, and Mr. W. C. Macpherson is stated to have thrown himself with great effect into the task of improving the administration of his district. Among junior members of the Civil Service, Mr. Luson is noticed for the thoroughness with which he dealt with important business connected with Wards' estates, Mr. Monahan and Mr. Streatfeild for general efficiency. Several Deputy Collectors have been favourably mentioned, among whom may be noted Baboo Soorjo Coomar Sen.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT OF THE GOVERNMENT CINCHONA PLANTATION AND CINCHONA FACTORY IN BENGAL FOR THE YEAR 1889-90.

FINANCIAL DEPARTMENT—MISCELLANEOUS.

Dated Calcutta, the 7th September 1890.

RESOLUTION.

READ—

The Annual Report of the Government Cinchona Plantation and Cinchona Factory in Bengal for the year 1889-90.

At the close of the year the plantation consisted of 4,682,401 trees of various ages and of a nursery stock containing 264,000 seedlings. The crop collected amounted to 304,705 pounds against 373,100 pounds in 1888-89. It was composed of 140,310 pounds of red or *succirubra* bark, 131,055 of Ledger's *calisaya*, 5,310 of *calisaya verde* and *morada*, and 28,030 of hybrid bark.

2. The outturn of the factory, which is regulated by the demand, was 1,833 pounds of sulphate of quinine and 6,578 pounds of febrifuge. The entire quantity of the quinine and a greater portion of the febrifuge were manufactured by the new fusel oil process which has now entirely taken the place of the old acid and alkali method of manufacture. The quinine is of excellent appearance, and in purity compares favourably with most of the brands of European

manufacture. The issues from the factory rose from 7,489 pounds in 1888-89 to 7,680 pounds in 1889-90, as will be seen from the following table:—

		1889-90.		1888-89.	
		lb	oz.	lb	oz.
To Medical Depot, Calcutta	...	2,197	0	2,140	0
Ditto, Bombay	...	2,224	0	1,250	0
Ditto, Madras		1,300	0
To Inspector-General of Civil Hospitals, Bengal	...	352	8	425	0
To Inspector-General of Jails	...	149	9	121	12
Sold to Government officers and to the public	...	2,756	0	2,251	4
Given as samples	...	1	0	1	4
Total	...	7,680	1	7,489	4

3. The revenue derived from the sale of sulphate of quinine, cinchona and crystalline febrifuge, cinchona bark and other products of the plantation amounted to Rs. 1,13,693-12-6 in 1889-90, against Rs. 1,29,160-3 in the previous year, as shown below—

		1889-90.			1888-89.		
		Rs.	A.	P.	Rs.	A.	P.
By sale of febrifuge, sulphate of quinine and bark to the public		43,112	13	0	37,706	0	0
By credit from the Medical Depôts	...	63,374	11	6	82,322	3	0
By credit from the Inspector-General of Civil Hospitals, Bengal	...	5,056	2	0	7,059	0	0
By credit from the Inspector-General of Jails, Bengal	...	2,150	2	0	2,073	0	0
Total	...	1,13,693	12	6	1,29,160	3	0

The net profit on the working of the cinchona estate amounted to Rs. 18,967-9-10 in 1889-90 against Rs. 27,844 in 1888-89, and is not unsatisfactory when the depressed condition of the cinchona industry is taken into consideration. It is understood that the exportation from Ceylon has at last begun to fall off, and in this case quinine will probably soon rise in price, and the demand for cinchona febrifuge will also increase.

4. Dr. King gives a favourable report of the good work done by the subordinate officers of the plantation and factory, and the Lieutenant-Governor is glad to again acknowledge the efficient services of Dr. King and of Mr. Gammie in their administration of the Department.

ORDER.—Ordered that a copy of this Resolution and of the Report referred to be forwarded to the Government of India in the Home Department, to the Political (Medical) Department of this Government, to the Superintendent of the Government Cinchona Plantation, to the Government of Madras, and to the Inspector-General of Civil Hospitals, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Secretary to the Govt. of Bengal.

ANNUAL REPORT ON THE GOVERNMENT CINCHONA PLANTATION AND
FACTORY IN BENGAL FOR THE YEAR 1889-90.

No. 36C, dated Royal Botanic Garden, Seebpore, near Calcutta, the 14th July 1890.

From—BRIGADE-SURGEON GEORGE KING, M.B., Superintendent, Royal Botanic
Garden, Calcutta, and Cinchona Cultivation in Bengal, and Officiating
Government Quinologist,

To—The Secretary to the Government of Bengal, Financial Department.

I HAVE the honour to submit herewith the annual report of the Cinchona
Plantations and Factory for the year 1889-90.*Twenty-eighth Annual Report of the Government Cinchona Plantation and Factory
in British Sikkim for the year 1889-90, by BRIGADE-SURGEON G. KING, M.B.,
LL.D., F.R.S., C.I.E., Superintendent of the Royal Botanic Garden, Calcutta,
and of Cinchona Cultivation in Bengal, and Officiating Government Quinologist.*1. The weather during the year presented no unusual features. The
plantation suffered neither from excessive rain nor from drought, nor was any
great mischief done by hail or landslips; and the growth of the plants both in
the nurseries and in the open was on the whole favourable.2. *Changes in the Plantation.*—The total number of trees uprooted for their
bark during the year, or which died from natural causes, was 373,690. Of this
total, 270,000 were red barks, the rest being either yellow barks or hybrids.
Many of the red barks were small stunted trees which yielded very little bark.
On the other hand, 245,860 new trees—exclusively yellow barks and hybrids—
were planted. The renewals were thus less numerous than the losses, a circum-
stance which is due to the enormous destruction of nursery stock by the violent
hailstorm which passed over the plantation in March 1889, and which was alluded
to in my last annual report. A reference to the table which forms Appendix C
of this report shows that at the end of the year under review the plantation
consisted of 4,682,401 trees of various ages, and of a nursery stock amounting to
264,000 seedlings. Of the trees in the open, there are now only 1,612,000 red
barks, and amongst the nursery stock there are none of this sort, the intention
being gradually to convert the plantation into one exclusively of quinine-yielding
species.3. *The year's crop.*—The crop collected during the year amounted to
304,705 pounds. This total is composed of 140,310 pounds of red or succirubra
bark, 131,055 of Ledger's calisaya, 5,310 of calisaya verde and morada, and
28,030 of hybrid bark. The proportion contributed by the plantations is as
follows: the old plantation (Rungbee and Mungpoo) yielded 222,025 pounds,
Sittong 50,180 pounds, and the young plantation at Rungjung in the Bhootan
Hills 32,500 pounds. With the exception of 310 pounds sold and issued on
indents to jails, the whole crop was as usual made over to the factory.4. *Expenditure on the plantation for the year.*—The total budget allotment
for the plantation was originally Rs. 85,795; but as the year advanced it was
found necessary to apply for a transfer of Rs. 10,000 from the plantation to
the factory budget. On the grant, thus reduced to Rs. 75,795, there was a
saving of Rs. 6,598-6, the net expenditure for the year having amounted to only
Rs. 69,196-10. The details of the expenditure are as follows:—

	Rs.	A.	P.
European establishment (including all salaries except that of Dr. King, Superintendent of the Botanic Garden, Calcutta), cooly labour and office establishment	62,363	8	8
Keep of animals for plantations	900	0	0
Contingencies, &c., including service postage stamps	4,635	5	0
Travelling allowance	458	12	0
Stores from England	839	0	4
Total	69,196	10	0

Against this expenditure there is to be put the crop of 304,705 pounds of dry
bark, the net cost of each pound of which was therefore 3 annas 7-602 pies.5. *Factory.*—The original budget allotment for the factory was Rs. 32,515,
which sum was subsequently increased by a transfer from the plantation budget
to Rs. 42,515. The expenditure, however, exceeded this amount by Rs. 571-13.
A large part of the factory expenditure was on machinery for working the new

fusel oil process, and this ought really to be debited to capital. But the factory has no capital account, all charges connected with it having hitherto been debited to current working expenses. And I have not thought it necessary on the present occasion to deviate from this practice, especially as such heavy expenditure on plant is not likely to be necessary for some time. To the cash expenditure of Rs. 43,086-13 there has to be added the cost of the bark used and of stores received from England. These items are as follows:—

Factory expenditure on chemicals, oil, labour and machinery ...	Rs.	A.	P.
Stores from England ...	38,845	6	11
Cost of bark used, 137,898 pounds of crop of 1888-89 at 3 annas 1·333 pies per pound ...	4,241	6	1
100,022 pounds of crop of 1889-90 at 3 annas 7·602 pies per pound ...	26,813	4	3
	22,714	5	9
Total ...	92,614	7	0

The products manufactured for this sum consisted of 1,833½ pounds of sulphate of quinine at a net cost of Rs. 11-14-3·026 per pound, and of 6,578 pounds of febrifuge at a net cost of Rs. 10-12-3·026 per pound. In short the quinine cost Rs. 11½ and the febrifuge Rs. 10¾ per pound.

6. *The fusel oil process of manufacture.*—The whole of the quinine and the greater part of the febrifuge were manufactured by the new fusel oil process; and, as the arrangements for working this process were quite completed during the year, the old acid and alkali method of manufacture has now been definitively abandoned. An additional year's experience of the fusel oil process confirms my previously expressed opinion of its complete success. The quinine turned out by it is of excellent appearance and great purity, in the latter respect comparing favourably with most of the brands of the drug of European manufacture.

7. *Sales of febrifuge and quinine during the year.*—The total issues for the year were 6,393¾ pounds of febrifuge, 1,252 pounds of quinine, and 34 pounds of crystalline febrifuge. These were distributed as follows:—

Details of the distribution of Cinchona Febrifuge, Crystalline Febrifuge, and Sulphate of Quinine during the financial year 1889-90.

To Medical Depôt, Calcutta—	lbs.	oz.
Cinchona febrifuge ...	1,997	0
Sulphate of quinine ...	200	0
To Medical Depôt, Bombay—		
Cinchona febrifuge ...	1,750	0
Sulphate of quinine ...	474	0

This is better by 191 pounds than the issues of the previous year, which amounted to only 7,489¼ pounds.

8. *Stock account.*—The bark in stock at the end of the year amounted to 426,275 pounds. Part of this bark (221,892 pounds) is of the crop of 1888-89, which cost 3 annas 1·333 pies per pound, and the remainder (204,383 pounds) is of the crop of 1889-90, which cost 3 annas 7·602 pies per pound. To save trouble in future calculations, I have taken the whole at its average cost, viz.

3 annas 4·338 pies per pound. The manufactured products have been taken at their actual cost, and the chemicals and other stores rather below their estimated value. As compared with that of 1888-89, the stock of last year stands thus:—

Stock on 31st March 1889.			Stock on 31st March 1890.		
	Rs.	A. P.		Rs.	A. P.
Chemicals and stores ...	10,000	0 0	Chemicals and stores ...	3,000	0 0
Cinchona febrifuge, 1,375 pounds, at Rs. 12-10-8·08 per pound ...	17,417	3 10	Cinchona febrifuge, 1,559½ pounds, at Rs. 10-12-3·026 per pound ...	16,786	13 2
Crystalline febrifuge, 54 pounds, at Rs. 16-6-2 per pound ...	884	13 0	Crystalline febrifuge, 20 pounds, at Rs. 16-6-2 per pound ...	327	11 4
Sulphate of quinine, 982 pounds, at Rs. 12-10-8·08 per pound ...	12,439	1 2	Sulphate of quinine, 1,562 pounds 13 ounces, at Rs. 11-14-3·026 per pound ...	18,583	0 5
Bark, 359,790 pounds, at 3 annas 1·333 pies per pound ...	69,958	8 8	Bark, 426,275 pounds, at an average of 3 annas 4·338 pies per pound ...	89,559	6 1
	1,10,699	10 8			
Increase in value ...	17,557	4 4			
Total ...	1,28,256	15 0	Total ...	1,28,256	15 0

There has thus been a considerable increase in the value of the stock. In other words the off-take of our manufacture has not kept pace with our production, nor has it increased in proportion to the reduction in the price of febrifuge from Rs. 16-8 to Rs. 14 and of quinine from Rs. 20 to Rs. 17 per pound. Although this result is to be regretted, it is not to be wondered at, since the price of all cinchona products in the open market still continues very low, and quinine is obtainable in the bazars at an unprecedentedly cheap rate, much of it, however, being of inferior quality.

9. *Financial result of the year's working.*—The figures already given afford the means of forming a balance sheet showing the exact financial result of the year's working. This is as follows:—

DR.			BALANCE SHEET.			CR.		
	Rs.	A. P.		Rs.	A. P.		Rs.	A. P.
To value of stock on 31st March 1889 ...	1,10,699	10 8	By value of stock on 31st March 1890 ...	1,28,256	15 0			
To cash received from the treasury during 1889-90 for expenditure on the plantations, viz. Rungbee, Mungpoo, Sittong, and Rungjung ...	68,357	9 8	By cash receipts from sale of sulphate of quinine, cinchona and crystalline febrifuge and cinchona bark, &c. ...	43,112	13 0			
To stores from England for plantations ...	839	0 4	By credit from Medical Depôts for cinchona febrifuge, viz.—					
To cash received from treasury during 1889-90 for expenditure on factory ...	38,845	6 11	Calcutta ...	27,958	0 0			
To stores from England for factory ...	4,241	6 1	Bombay ...	24,500	0 0			
Profit on the year's working, viz.—				52,458	0 0			
Cash ...	1,410	6 0	By credit from Medical Depôts for sulphate of quinine, viz.—					
Increase of stock of quinine, febrifuge and bark ...	17,557	3 10	Calcutta ...	3,103	2 0			
			Bombay ...	7,813	9 6			
				10,916	11 6			
			By credit from Inspector-General of Civil Hospitals, Bengal, for cinchona and crystalline febrifuge supplied to medical officers of Bengal, viz.—					
			For cinchona febrifuge ...	4,680	2 0			
			For crystalline febrifuge ...	376	0 0			
				5,056	2 0			
			By credit from Inspector-General of Jails, Bengal, for cinchona and crystalline febrifuge and sulphate of quinine supplied to jails and lock-ups in Bengal, viz.—					
			For cinchona febrifuge ...	1,986	10 0			
			For crystalline febrifuge ...	157	0 0			
			For sulphate of quinine ...	1	8 0			
				2,145	2 0			
			By credit from Inspector-General of Jails, Bengal, for cinchona bark supplied to the medical officer of the Alipore Jail Hospital ...					
							5	0 0
Total ...	2,41,950	11 6	Total ...	2,41,950	11 6			

This shows a balance of profit of Rs. 18,967-9-10, which, in the present depressed condition of the cinchona industry generally, may, I trust, be accepted as satisfactory. This profit, as will be observed, is composed largely of increase in the amount of the stock of quinine, febrifuge, and bark in hand at the end of the year, as compared with the value of the stock at its commencement. It would have been more satisfactory had the cash realizations been greater, but in the present depressed condition of the industry it is a matter for congratulation when a cinchona estate is worked without actual loss. As was explained in last year's annual report, the extraordinary fall in the price of quinine during the past few years has been due to excessive exportation of cinchona bark from Ceylon. Statistics, however, show that this exportation is at last beginning to fall off. Before very long it is therefore probable that quinine will rise in price and that the demand for cinchona febrifuge will again increase. It is of course only from the narrow point of view of a cinchona grower that an increase in the price of so useful a medicine can be considered as desirable. From the point of view of Government, it would be a misfortune, since it would increase to the people the price of the best medicine for fever.

10. The crop of bark for the current year will as usual be taken with reference to the requirements of the factory.

11. The sum of Rs. 2,377-9 received for grazing and land rent was paid into the Darjeeling cutchery, no credit being taken for it in the above accounts.

12. The fuel plantation was thinned for the first time this year, and a large quantity of poles, more or less useful for building as well as for fuel, was taken out. The growth of this plantation continues to be most satisfactory.

13. Mr. J. A. Gammie, the Deputy Superintendent of the plantation and factory, was absent on privilege leave for three months; but during the rest of the year he was in executive charge at Mungpoo. His services require no recommendation from me. Mr. R. Pantling, the senior assistant, went on furlough towards the end of the year, and Mr. G. Gammie was appointed to officiate for him. Messrs. Pantling, Parkes, G. Gammie and Hartless have all worked well; as also have the head writer, Baboo Gopal Chandra Datta, and the second clerk, Baboo Davendra Nath Basu.

**RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON
THE ADMINISTRATION OF THE SALT DEPARTMENT
FOR THE YEAR 1889-90.**

FINANCIAL DEPARTMENT—SALT.

Calcutta, the 9th September 1890.

RESOLUTION.

READ—

The report of the Board of Revenue on the administration of the Salt Department for the year 1889-90.

The following statement shows the receipts and charges of the Department since 1884-85 :—

HEADS.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	Increase in 1889-90 compared with 1888-89.	Decrease in 1889-90 compared with 1888-89.

The results of the year under review, as compared with the previous year, show a decrease of Rs. 2,33,974 in receipts and an increase of Rs. 34,750 in charges. The decrease in the revenue from import duty is attributed to smaller clearances of duty-paying salt, while the manufacture of excise salt in Orissa has not recovered from the change of system under which the administration has been transferred from the Government of Bengal to that of Madras. On the other hand, it is to be remembered that large quantities of Ganjam salt, on which the duty is paid in Madras, are now consumed in Orissa. The increase in the receipts from "Rent of warehouses" is due to increased bonding operations, induced partly by the larger steamer traffic and partly by the reduction of the rate of rent from Rs. 5 to Rs. 3 per 1,000 maunds. The rent was reduced in April 1887, and although in the first instance it was followed by a reduction in receipts, the result in the long run has fully justified the change of policy then introduced. A further help to bonding operations will be afforded by the erection of pontoons in front of the Golahs, and the construction of a shunting line connecting them with the Howrah terminus, recently sanctioned by Government. The increase in charges is due principally to the purchase of Mr. Kilby's patent scales for weighing salt and to larger refunds of customs duty.

2. The total quantity of salt in stock at the commencement of the year was 20,46,288 maunds, comprising 18,99,649 maunds of imported salt and 1,46,639 maunds of excise salt. During the year 1,00,72,857 maunds were imported and 70,293 maunds were manufactured, against 1,04,80,285 and 2,44,512 maunds in the previous year. The falling off in imports was occasioned by smaller importations of Liverpool salt, due to the large stocks in bond, the raising of the price by the Salt Syndicate, and the growing practice of importing salt by the

Suez Canal steamers. There can be no doubt that the action of the Cheshire Salt Syndicate has acted very prejudicially to the Liverpool trade, the exports from the United Kingdom having decreased from 83 lakhs of maunds to 70 lakhs, while there has been a corresponding increase in the trade from Hamburg, amounting to 4,44,000 maunds, from the Arabian and Persian Gulfs amounting to 2,70,000 maunds, and from Aden amounting to 4,44,000 maunds. The large increase in steamer traffic is also a point deserving special consideration. Three years ago the whole of the salt imported came in sailing vessels, but during the past year 27 steamers brought 10,51,557 maunds. Mr. Armstrong, the Collector of Customs, observes that the tendency of this change in the trade is to limit the quantities imported to actual requirements.

3. The decrease in the clearances of salt from shipboard, amounting to 10,24,796 maunds in Calcutta and 1,06,748 maunds in Chittagong, has been counterbalanced by larger clearances from bond, which amounted to 32,64,318 maunds, against 23,85,541 maunds in 1888-89. The consumption in saliferous districts, other than Orissa, showed a decrease of 33,880 maunds as compared with the previous year. The decrease chiefly occurred in Midnapore, and to a lesser extent in the 24-Pergunnahs, and is attributed to the prevailing scarcity. The proportion of seizures to unsuccessful searches (1,476 to 363) was not so good as last year, but the number of seizures shows a very large increase. In the two districts of Midnapore and Backergunge the number of unsuccessful searches exceeded that of seizures. This result is far from satisfactory, and the Lieutenant-Governor is glad to see that it has attracted the careful attention of the Board. The Board have rightly understood that the orders of Government, conveyed in last year's Resolution, that "the police, instead of hunting for trivial cases of illicit manufacture, should rather direct their attention to cases of illicit manufacture for sale," were not at all intended to be read as a permission to make salt for home consumption. Any manufacture of salt without a license duly obtained is illegal. But the policy of Government in regard to salt has always been a liberal one. While, on the one hand, there can be little doubt that the salt revenue is continually defrauded by persons who carry on illicit manufacture with comparative impunity, and it is essential that the police should not relax their exertions to put a stop to systematic manufacture with a view to sale, it must be remembered that the poorer country folk have from time immemorial been in the habit of manufacturing salt, the materials of which lie at their very doors, for their own use, and that the rigorous prosecution of the law in prevention of this practice may very easily create suffering and distress among them, in comparison with which the loss of revenue incurred is but a trifling matter. The question is one of acknowledged difficulty, and much must depend on the discretion and capacity of individual officers in dealing with the penal provisions of the law.

4. The despatches of salt into the interior by the different water routes and railways, as shown in the following table, show a decrease of 2,99,263 maunds:—

YEAR.	Via Balli Khali.	Via Sankrail.	Via Gawkhally.	Via Kidderpore.	Via Baloghata.	Total carried by water.	By the East Indian Railway.	By the Eastern Bengal and Calcutta and South-Eastern Railway or via Chitpore.	Via Ruthola Ghat.	Total carried by rail.	GRAND TOTAL.
1888-89	Mds. 10,81,504	Mds. 6,49,576	Mds. 2,79,408	Mds. 3,62,140	Mds. 10,66,200	Mds. 40,38,828	Mds. 35,66,027	Mds. 10,33,303	Mds. 17,625	Mds. 45,99,655	Mds. 86,38,483
1889-90	10,36,288	5,32,651	2,45,352	2,97,920	17,00,657	38,02,868	35,42,162	9,82,780	9,660	45,34,602	83,37,470
Increase	34,291
Decrease	55,216	1,16,925	34,146	64,220	2,36,960	13,865	40,623	7,965	62,347	2,99,263

There was some discussion during the past year regarding the abolition or modification of the present rowannah system, but it has eventually been decided that no alteration in it is at present necessary.

5. The proposal to extend the Indian Salt Act to the whole of the Province, to which reference was made in last year's Resolution, has been abandoned; but the Act has been extended to the town of Calcutta, as well as the area included in a radius of two miles from its limits, and the control of the saltpetre refineries within this locality has been entrusted to the Commissioner of Northern Indian Salt Revenue.

6. Mr. Kilby's scales for the weighment of salt have now entirely superseded the old scales in the port of Calcutta, and the proposal to introduce them in the Chittagong port has recently been sanctioned by Government. The Lieutenant-Governor is glad again to observe that Mr. Kilby, the Superintendent of the Sulkea Salt Golahs, has continued to discharge his duties in a very satisfactory manner.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,
Secretary to the Government of Bengal.

APPOINTMENT OF A COMMITTEE TO CONSIDER THE QUESTION
OF THE FOUNDATION AND FUTURE MANAGEMENT OF
A NEW LEPER ASYLUM FOR CALCUTTA.

MEDICAL.

Dated the 16th September 1890.

READ—

Bengal Government Resolution, dated the 29th July 1890, regarding the foundation and future management of a new Leper Asylum for Calcutta.

Letter from the President of the District Charitable Society, No. 402, dated the 5th August 1890.

Letter from the Joint Honorary Secretaries to the Prince Albert Victor Permanent Memorial Fund, dated the 12th August 1890.

Letter from the Chairman of the Corporation of Calcutta, No. 3902, dated the 1st September 1890.

In the Resolution cited in the preamble the outline of a scheme for providing Calcutta with a new, enlarged and improved Leper Asylum was indicated, and it was proposed that the whole question should be considered by a Committee consisting of the President and two members of the District Charitable Society, the Chairman and two members of the Corporation of Calcutta, Mr. W. J. Simmons on the part of the Public Health Society, Calcutta, a representative of the Prince Albert Victor Permanent Memorial Fund, and two medical officers to be selected by Government. It was added that the Lieutenant-Governor might appoint additional members should it be found necessary to do so. The Resolution was duly communicated to the Corporation and other bodies named therein, and they were asked to nominate their representatives for appointment to the Committee. Their replies have now been received, and the Lieutenant-Governor is pleased to sanction the formation of a Committee composed of the following gentlemen:—

President:

1. The Hon'ble Justice H. T. Prinsep, President of the District Charitable Society.

Members:

2. Mr. J. Lambert, C.I.E.
3. Mr. H. Lee, C.S., Chairman of the Corporation of Calcutta.
4. Mr. W. J. Simmons, Representative of the Public Health Society, Calcutta.
5. Nawab Abdul Luteef Bahadur, C.I.E., a representative of the District Charitable Society.
6. Babu Iszur Chunder Mitter, a representative of the District Charitable Society.
7. Babu Surendra Nath Banerji, a representative of the Corporation of Calcutta.
8. Mr. W. M. Osmond, a representative of the Corporation of Calcutta.
9. Babu Amrita Nath Mitter, Representative of the Subscribers to the Permanent Memorial Fund.
10. Surgeon-Major W. H. Gregg, Sanitary Commissioner for Bengal.
11. Dr. W. J. Simpson, Health Officer for the Town of Calcutta.

Secretary:

Mr. Patrick McGuire, Secretary, District Charitable Society.

The Committee are requested to take into consideration the suggestions contained in the concluding paragraph of the Government Resolution of the 29th July last, and to favour the Lieutenant-Governor with their views in connection with the establishment and management of the proposed institution.

ORDER.—Ordered that a copy of this Resolution be communicated to each of the members of the Committee.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. C. STEVENS,
Offg. Chief Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 13th September, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
